HEADLINE JUDGMENT

Note: 23 Jul figures are intraday prints; 22 Jul is now a final close ($90.18 Brent). Restated continuation series (front-month CO2/CL2) in force. Score HOLDS at 25/30 — all six channels unchanged, a seventh session at 25 — but the 22 Jul close put the first Stage-4 leg THROUGH its threshold: the 10Y closed 4.6545%, above the 4.65% line for the first time in the war (first close above it since 19 May), leaving the 30Y — 5.1448%, 5.5 bp below its 5.20% leg — as the sole binding constraint on Threshold B. Brent closed $90.18, the first $90-handle close since 11 Jun (+$1.66 d/d; +$0.60 above my intraday), and prints $91.16 this morning — while the ACTIVE contract (COA) prints $95.70, above the $95 trigger level on the unscored board. MOVE closed 76.31, through the 75 line for the first time since 13 Jul — both legs of the Treasury downgrade condition now fail at once. The gas complex set war-era records on both benchmarks: TTF closed €62.54, the first doubling vs pre-war on a close basis, and Asia LNG printed FRESH at ¥3,499 (+110%), surpassing the 23 Mar record. AAA gasoline printed $4.69 (21 Jul) — a sixth consecutive rise, 6 cents from the political→5 trigger. The news hardened on both hands: an 11th consecutive night of strikes reached Bushehr and Tabriz, Trump declared a bridge-or-power-plant-per-ship retaliation doctrine reaching into Tehran, and the Houthis' Saudi-ports embargo now hangs over the Yanbu route that carried ~75% of Saudi crude exports in early July (Kpler) — while the 10-day ceasefire remains tabled, received and unaccepted, with a US decision said to be days away. No trigger fired on a confirmed close, so no channel moved. Both event channels remain maxed at 5 — the hold is an artifact of the scale, not evidence of stability. Sequencing 25 → 25 → 25.

1 · Live tape

Oil and natural gas — Bloomberg front-month / active

23 Jul 2026 readings are intraday prints; 22 Jul and earlier are final closes (restated continuation series; front-month CO2/CL2). d/d deltas are 23 Jul intraday vs 22 Jul close; w/w deltas are vs 16 Jul close.

Benchmark	Intraday 23 Jul	Δ d/d	Δ vs pre-war close (27 Feb)	BBG ticker
Brent front-month	$91.16 /bbl (H 91.51 / L 90.62)	+$0.98 (+$8.20 w/w)	from $72.48 (+25.8%) — ~$18.7/bbl premium; intraday high $3.49 below the $95 oil→3 trigger; active COA prints $95.70 — through the trigger level on the unscored board	CO2 Comdty (Close)
Brent · 22 Jul close (final)	$90.18 /bbl (+$0.60 vs my 22 Jul intraday $89.58)	first $90-handle close since 11 Jun; third consecutive plateau-breaking close	$4.82 below the $95 trigger on a close basis — less than last week's advance; the range has shifted to $88–91	CO2 Comdty
WTI front-month	$84.47 /bbl	+$0.83 (+$6.19 w/w)	from $67.02 (+26.0%) — the CL2 series remains a flagged artifact: the 22 Jul CL2 close FELL $0.70 while the active CLA rose +$2.49 to $86.83; CLA prints $88.13 intraday	CL2 Comdty
Brent–WTI spread	$6.69 /bbl	inflated by the CL2 artifact	~$7.6 on the active contracts	derived
Henry Hub natural gas	$2.949 /MMBtu	+$0.024 (+$0.09 w/w)	from $3.06 (–3.7%) — US gas BELOW pre-war; not Hormuz-exposed	NGA Comdty
TTF Dutch gas (active)	€62.90 /MWh	+€0.36 (+€8.12 w/w)	from €31.23 (+101.4%) — 22 Jul close €62.54 is the first DOUBLING vs pre-war on a close basis and a war-era record close	TZTA Comdty
Japan/Asia LNG (22 Jul close — FRESH print)	¥3,499	+¥93 vs 21 Jul	from ¥1,669 (+109.6%) — war-era RECORD, surpassing the 23 Mar peak; no 23 Jul print yet (flagged, not carried)	JGLA Comdty

Strait · eleventh night of strikes	US bombing entered an eleventh consecutive night (concluded 8:15pm ET 21 Jul); explosions reported in Bushehr County — home to Iran's nuclear plant and a naval base — and near Tabriz; Trump (22 Jul) vows to destroy one Iranian bridge or power plant, including in Tehran, for every ship attacked; Houthi embargo of Saudi ports in force; the 10-day ceasefire remains tabled and unaccepted.	CENTCOM / JPost / Al Jazeera / Axios
Insurance & traffic	Transits ~17% of typical (15 vs 88/day, 19 Jul count; basis revised from ~11%); 443–444 anchored (tracker basis revised from ~340); 70 tankers AIS-dark in 24h vs a 46.1 7-day average; war-risk ~8× pre-crisis, VLCC ~$2.5m; six P&I; clubs withdrawn; 8 of 9 carriers rerouting via the Cape.	straits.live / Windward

US Treasuries and inflation expectations — Bloomberg

23 Jul 2026 yields are intraday. d/d deltas are vs the 22 Jul close; w/w vs 16 Jul. The 10Y Stage-4 leg has now CROSSED on a confirmed close (4.6545% vs the 4.65% line); the 30Y leg is 5.5 bp away and is the sole binding constraint.

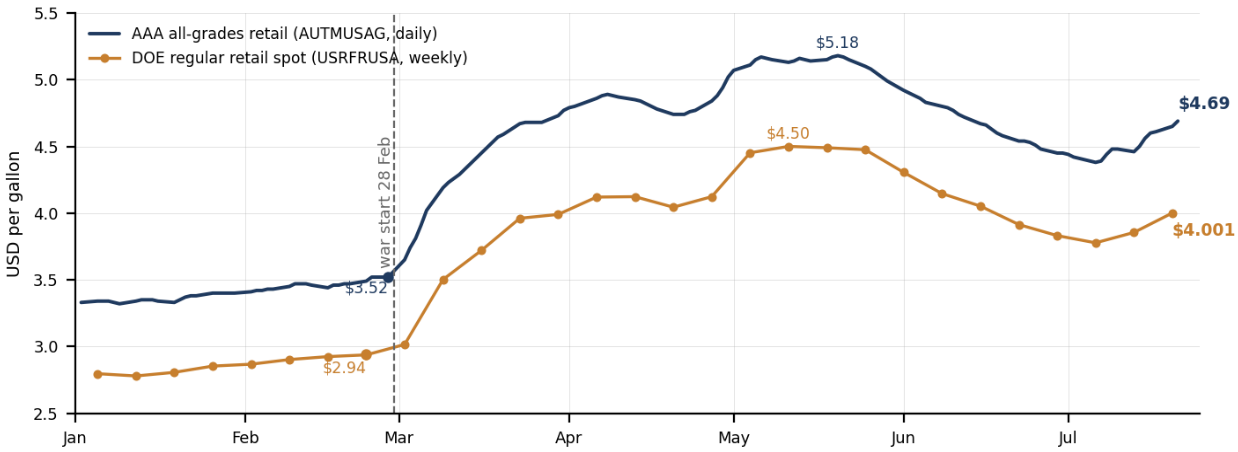
Tenor	Yield (%) — intraday 23 Jul	Δ d/d (bp)	Δ w/w (bp)	Δ vs pre-war (bp)	BBG ticker
2-year UST	4.30	+0.0	+15.7	+92 (from 3.37%)	USGG2YR Index
5-year UST	4.40	+0.0	+13.4	+90 (from 3.50%)	USGG5YR Index
10-year UST	4.65	–0.4	+9.7	+71 (from 3.94%) — 22 Jul close 4.6545%, the FIRST close above the 4.65% Stage-4 leg of the war (last: 19 May); intraday it holds a fraction above the line	USGG10YR Index
30-year UST	5.14	–0.5	+5.6	+53 (from 4.61%) — 22 Jul close 5.1448%, highest since 19 May; 14.5 bp above 5.00%; 5.5 bp below the 5.20% Stage-4 leg — now the binding constraint	USGG30YR Index
2s10s spread	+35 bp	–0.4	–5.8	–21 (flatter)	USYC2Y10 Index

Tenor	Yield (%) — intraday 23 Jul	Δ d/d (bp)	Δ w/w (bp)	Δ vs pre-war (bp)	BBG ticker
10Y breakeven inflation	2.28	+0.1	+5.1	+2.6 (from 2.257%) — second consecutive close above the pre-war anchor (2.270%, 2.281%)	USGGBE10 Index
5Y5Y forward inflation	2.22	–0.1	+3.0	+7.6 (from 2.14%) — third consecutive close above the 2.20% line (2.206%, 2.219%, 2.219%); 8.1 bp below the 2.30% →5 trigger; the advance paused this session	USGG5Y5Y Index
SOFR (lagged print, 21 Jul)	3.61	—	—	series lags	SOFRRATE Index

Cross-asset stress and political-transmission gauges — Bloomberg

Gauge	Latest	As of	Δ vs pre-war	Interpretation
DXY	101.05	23 Jul intraday	+3.44 (from 97.61)	Rangebound ~101 — slightly softer d/d; still no haven bid; the dollar is not the stress valve.
MOVE	76.31	22 Jul close (23 Jul lagged)	+2.93 (from 73.38)	THROUGH the 75 line — first close above it since 13 Jul, a fourth consecutive rise. The 75 line is half the Treasury downgrade condition; both legs of that condition now fail simultaneously.
VIX	16.64	22 Jul close (23 Jul lagged)	–3.22 (from 19.86)	Eased AGAIN (17.05 → 16.64) while the long end sold off and MOVE crossed 75 — the rates/equity divergence is at its widest of the month.
AAA gasoline	$4.69 /gal	21 Jul print (latest; 22–23 Jul pending)	+$1.17 (from $3.52, +33%)	The political-stress reference (pre-war $3.52, peak $5.18). Sixth consecutive rise ($4.46 → $4.69); 6 cents below the $4.75 threshold — one to two prints away at the recent 4–5c pace.
DOE gasoline	$4.001 /gal	20 Jul weekly print	~+$1.06 (from ~$2.94, +36%)	First $4-handle since 15 Jun (+14.6c on the week); next weekly print lands Monday 27 Jul.

US retail gasoline — the two tracked series, 2026 year-to-date



AUTMUSAG (AAA all-grades retail pump, daily) is the political-stress score reference (pre-war $3.52, peak $5.18, latest $4.69 on 21 Jul); USRFRUSA (DOE regular-grade retail spot, weekly) is the complementary gauge (pre-war ~$2.94, peak $4.50, latest $4.001 on 20 Jul). The AAA series has risen in six consecutive prints ($4.46 → $4.69) and sits 6 cents from the $4.75 political→5 threshold; the 22–23 Jul prints are pending. At the recent 4–5c/session pace the next confirmed print lands at or through the trigger — the channel is evaluated on confirmed prints only, so the score holds until the data lands.

Strait operational state

Indicator	Current reading	Source
Strait closed · day ~145	Closed to commercial traffic since 12 Jul (blockade regime since 28 Feb war start); US naval blockade plus escort operation (~900 escorted transits, ~450m bbl since early May, per CENTCOM); Iran conditions transit on its own coordination and fees.	CENTCOM / maritime trackers
Eleventh consecutive night of US strikes + a new retaliation doctrine	CENTCOM strikes (concluded 8:15pm ET 21 Jul) targeted military operations centers, maritime capabilities, aircraft hangars, drone storage and logistics — explosions reported in Bushehr County (nuclear plant / naval base) and near Tabriz. Trump (Truth Social, 22 Jul): every Iranian attack on a ship will be answered by destroying ONE BRIDGE OR POWER PLANT, including in Tehran. Pentagon identified a fourth US service member killed.	CENTCOM / JPost / Al Jazeera / Axios / CBS
Houthi embargo of Saudi ports — Yanbu exposure quantified	The Houthi maritime embargo of Saudi Arabia is in force (Saree statement). Kpler: ~75% of Saudi crude and condensate exports moved via Yanbu in the first half of July — VLCCs from Yanbu must transit Bab el-Mandeb within Houthi range. JMIC counts 30 Hormuz transits over 17–19 Jul vs a 138/day pre-war level.	Seatrade Maritime / Kpler / JMIC
Mediation — 10-day ceasefire still tabled, unaccepted	The Qatar/Egypt/Pakistan/Oman framework (10-day truce, both lanes reopened, Malacca-style fees) is received by both sides; Iran (Baghaei) confirms receipt; Trump is undecided between the ceasefire and a massive joint operation with Israel — decision said to be days away; dozens of US jets and refuelers deployed; IDF on high alert.	Axios / Reuters

2 · US economic shock — analysis with bond yields

The US economic shock holds at 25/30, but the 22 Jul US session crossed a line the war had never crossed: the 10Y closed above its Stage-4 threshold. Three consecutive sessions have now closed at multi-week or multi-month extremes across Brent, the 10Y, the 30Y, TTF and Asia LNG, and the vol complex has joined — MOVE closed through 75 for the first time since 13 Jul. Nothing crossed a scoring trigger on a confirmed close, so no channel moved — but Threshold B now needs only the 30Y: 5.5 bp at the current ~1–2 bp/session pace of the long-end sell-off is measured in sessions, not weeks. The distances: oil →3 $4.82 on a close basis (active board already through $95), gasoline 6 cents, forward inflation 8.1 bp, Stage-4 B 5.5 bp on its last uncrossed leg.

2.1 · Bond-yield transmission

23 Jul yields are intraday; d/d vs 22 Jul close, w/w vs 16 Jul. No channel moved; score held at 25.

(i) Treasury — held at 5; the downgrade condition now fails on both legs at once. The 30Y closed 22 Jul at 5.1448% — a third consecutive highest-close-since-May — with the cushion above the 5.00% downgrade leg widening 13 → 14.5 bp; and MOVE closed 76.31, through the 75 line that forms the other half of the condition, on a fourth consecutive rise. Ten days ago this channel was held at 5 by hysteresis alone; today the hold is fully fundamentals-based — term premium, supply concession ahead of next week's FOMC (28–29 Jul) and the next long-duration auctions, and a re-building war-risk premium.

(ii) Inflation anchor — held at 4; the advance paused but did not reverse. 5Y5Y closed 2.2190 — a third consecutive close above the 2.20% line (2.206%, 2.219%, 2.219%) — and prints 2.2177 intraday, marginally softer d/d. The 10Y breakeven closed 2.2814, its second consecutive close above the pre-war anchor and the highest since early June. The 2.30% →5 trigger is 8.1 bp away on a close basis; the downgrade (a sustained move to the 2.142% anchor) is receding.

(iii) Oil — held at 2; the scored series lags a board that has already crossed. The 22 Jul close $90.18 is the first $90-handle close since 11 Jun and the third consecutive plateau-breaking close; the intraday tape prints $91.16 (H $91.51). The $95 →3 trigger is $4.82 above the confirmed close — well inside the +$8.20 the front-month has added in a week — and the ACTIVE contract closed $94.07 and prints $95.70 this morning: the unscored board is already through the trigger level, telling you where the continuation series rolls. The bypass pipelines remain the cushion, and the Yanbu exposure is now quantified: Kpler puts ~75% of Saudi crude exports through the Red Sea outlet the Houthis have just embargoed. A credible strike there collapses the containment argument in one session. (The CL2 WTI series remains a flagged artifact — its 22 Jul close FELL $0.70 while the active CLA rose $2.49; WTI levels are read off the active board.)

2.2 · What would push the shock to Stage 4

Stage 4 is a credit/auction event. The 10Y leg of Threshold B has crossed; the 30Y leg is the last one standing.

Threshold A · 13 May 30Y auction. Historical. Cleared at 5.050%; the 9 Jul re-opening cleared 5.06% with a 0.3 bp stop-through. With the 30Y closing 5.1448% and rising, the next long-duration supply prices well above both — a live demand test, now with next week's FOMC (markets price ~80% no-change, September ~50/50) as the macro overlay.

Threshold B · 30Y above 5.20% with 10Y above 4.65%. HALF-CROSSED — a war first. The 10Y closed 22 Jul at 4.6545%, through its leg (the first close above 4.65% since 19 May); the 30Y closed 5.1448%, 5.5 bp below its leg (13 Jul: 9.5 bp; 21 Jul: 6.9 bp). Intraday the 10Y holds a fraction above the line (4.6505%) and the 30Y sits 6.0 bp below (5.1396%). Both legs must be through together for the threshold to fire — the 30Y is the sole binding constraint, and at the past week's ~1–2 bp/session long-end drift the gap is measured in sessions. Any long-duration supply or a hawkish FOMC read is the catalyst.

Threshold C · MOVE above 130. Far — but the direction has turned. MOVE 76.31 is through the 75 line for the first time since 13 Jul and has risen four straight sessions (72.66 → 74.67 → 76.31) while VIX eased to 16.64. The vol complex is repricing on the rates side only — the equity/rates divergence is the widest of the month.

2.3 · Cross-asset

The re-pricing remains orderly but is broadening — levels first, rates vol second, equities still absent. Brent, the 10Y, the 30Y, TTF and Asia LNG have re-marked for three consecutive sessions; MOVE has now followed through 75 while VIX eased to 16.64 — equities continue to treat this as a rates/energy story. The dollar is flat at ~101; no haven bid. The gas complex remains the most stressed corner and set records on both benchmarks: TTF's 22 Jul close doubled the pre-war level for the first time (+100.3% on a close basis; +101.4% intraday) and Asia LNG's fresh ¥3,499 print is a war-era record — while US Henry Hub sits 3.7% BELOW pre-war: the signature of a Hormuz/LNG-routing shock, not a global-energy shock. The cross-asset risk remains geographic: Kpler's 75%-via-Yanbu figure means the Houthi embargo now sits directly on the bypass architecture keeping oil at 2/5 — a Yanbu event would move crude, breakevens and bond vol together, at full amplitude.

3 · Shock score

Total: **25/30 — CRISIS band.** Band thresholds: 0–7 watch · 8–14 stress · 15–21 systemic-risk watch · 22–30 crisis.

Channel	Score	Rationale	Triggers
Maritime denial	5/5	Held at 5 (max). Strait closed to commercial traffic; transits ~17% of typical on the revised count; 443–444 ships anchored; 70 tankers AIS-dark in 24h (a spike vs the 46.1 average); six P&I; clubs withdrawn; the Houthi embargo extends the denial regime to Saudi Red Sea ports. No verified reopening.	↑ at max. ↓ verified reopening (escorted convoys) with traffic above 25% of normal for 10 sessions → to 3–4.
Oil price shock	2/5	Held at 2. The 22 Jul close $90.18 — first $90-handle close since 11 Jun, third consecutive plateau-breaking close; intraday $91.16 (+25.8% vs pre-war, ~$18.7 premium); the ACTIVE contract prints $95.70, through the trigger level on the unscored board. $4.82 below the $95 trigger on a close basis — inside one week's advance.	↑ Brent above $95 sustained → to 3. ↓ mediated pause + close back at/below the $72.48 anchor → to 1.
US inflation impulse	4/5	Held at 4. 5Y5Y: three consecutive closes above the 2.20% line (2.206%, 2.219%, 2.219%), intraday 2.218% — the advance paused this session; 10Y BE closed above its pre-war anchor a second time (2.281%). 8.1 bp below the →5 trigger on a close basis.	↑ 5Y5Y sustained above 2.30% → to 5. ↓ 5Y5Y sustained at/below the 2.142% pre-war anchor → to 3.
Treasury stress	5/5	Held at 5 — fundamentals-held. 30Y closed 5.1448% (highest since 19 May), 14.5 bp above the 5.00% leg; MOVE 76.31, THROUGH the 75 line on a fourth straight rise. Both legs of the downgrade condition now fail simultaneously — the condition is receding at its fastest of the month.	↑ at max. ↓ 30Y close under 5.00% with MOVE under 75 sustained → to 4.
Political stress	4/5	Held at 4 — one to two prints from the trigger. AAA $4.69 (21 Jul print, latest confirmed) — sixth consecutive rise, 6c below $4.75; DOE weekly $4.001. The 22–23 Jul prints are pending; at the recent 4–5c pace the next print lands at or through the threshold. Evaluated on confirmed prints only.	↑ gasoline above $4.75 sustained → to 5. ↓ toward the $3.52 pre-war level → to 3.
Escalation risk	5/5	Held at 5 (max). Eleventh consecutive night of US strikes, reaching Bushehr County and Tabriz; Trump declares a bridge-or-power-plant-per-ship doctrine including Tehran targets; Houthi embargo of Saudi ports in force; IDF on high alert for a possible joint full-scale operation. The ceasefire proposal is live but unaccepted — the decision window is said to be days.	↑ at max. ↓ mediated stand-down + talks resume → to 4–3.
TOTAL	25/30	CRISIS band — seventh session at 25, and the war crossed its first Stage-4 leg: the 10Y closed above 4.65%. The gap to the next tier: political →5 is 6c away on a pending print, oil →3 $4.82 (active board already through $95), US-inflation →5 8.1 bp, Stage-4 B 5.5 bp on the last leg. With both event channels maxed, only market channels can move the score — and all four sit within one normal week's move of their triggers.	

4 · What’s changed since the last edition (22 Jul → 23 Jul AM)

Score holds at 25/30 for a seventh session — but the 22 Jul close crossed the war's first Stage-4 leg. No channel moved; every market channel again ended closer to its upgrade trigger. Source: Bloomberg.

The 10Y closed above 4.65% — a war first. 4.6545% (highest since 19 May), through the Stage-4 B leg it had approached to within 2.2 bp the session before. The 30Y closed 5.1448% (also highest since 19 May), leaving it the sole binding constraint at 5.5 bp. MOVE closed 76.31, through the 75 line for the first time since 13 Jul. Source: Bloomberg.

Brent's first $90-handle close since 11 Jun; the active board crossed $95. CO2 closed $90.18 (+$1.66); COA closed $94.07 and prints $95.70 intraday — above the oil→3 trigger level on the unscored contract. The scored front-month is $4.82 from the trigger on a close basis. Source: Bloomberg.

The gas complex set records on both benchmarks. TTF closed €62.54 — the first doubling vs pre-war on a close basis, a war-era record close; Asia LNG printed FRESH at ¥3,499 (+109.6%), surpassing the 23 Mar war-era record. US Henry Hub sits 3.7% below pre-war. Source: Bloomberg.

Trump declared an infrastructure-per-ship retaliation doctrine. One bridge or power plant — including in Tehran — for every ship Iran attacks (Truth Social, 22 Jul), alongside an eleventh night of strikes reaching Bushehr County and Tabriz; the Pentagon identified a fourth service member killed. Source: Axios / Washington Post / CENTCOM / JPost / CBS.

The Yanbu exposure is now quantified. Kpler data show ~75% of Saudi crude and condensate exports moved via Yanbu in the first half of July — the route the Houthi embargo targets; JMIC counts Hormuz transits at 30 over 17–19 Jul vs 138/day pre-war. Source: Seatrade Maritime / Kpler / JMIC.

Gasoline: a sixth consecutive rise. The 21 Jul AAA print landed at $4.69 — 6 cents from the political→5 trigger; the 22–23 Jul prints are pending. Source: AAA / Bloomberg.

5 · Scenario map · next 7 to 30 days

Scenario	P	Description	Market path
Return to full war	38%	The modal path strengthens: an eleventh night of strikes reaching Bushehr and Tabriz, a declared infrastructure-per-ship doctrine with Tehran targets, IDF on high alert for a joint operation, and a decision window of days with the ceasefire unaccepted.	Brent $105–140; MOVE above 90; oil to 3–4, political to 5, US-inflation to 5; score 28–30.
Contained but violent — blockaded stalemate	23%	Strikes continue but stay off major energy infrastructure; escort-only transits; the bypass pipelines keep capping crude. Three weeks of re-pricing, the Houthi embargo on the bypass outlet and the active board through $95 all say this equilibrium is eroding.	Brent $88–95; MOVE 74–84; risk premium $16–24/bbl; score 25–26 as political→5 lands.
Deal collapse — MoU formally lapses	20%	The ceasefire proposal is rejected or expires; sanctions harden; the strait stays shut; fighting persists at high intensity without full-war targeting.	Brent $92–108; oil to 3; 30Y above 5.20% with the 10Y already through 4.65% (Stage-4 B trips); score 26–27.
Regional relapse — Gulf energy infrastructure hit	10%	Iran or the Houthis strike Yanbu, the East–West pipeline, Abqaiq/Ras Tanura or Fujairah — removing the last cushion. Kpler's 75%-via-Yanbu figure makes this the best-armed tail in the map, and the embargo is now in force.	Brent $150+; emergency policy; HY spreads above 500 bp; score 29–30.
Mediated pause — the 10-day ceasefire sticks	9%	Washington and Tehran accept the Qatar/Egypt/Pakistan/Oman framework; strikes halt, both lanes reopen under the fee regime. Still live — Iran confirms receipt, Trump keeps a conditional door open — but the doctrine escalation and decision-window rhetoric cut against near-term acceptance.	Brent $74–86; MOVE under 70; Treasury→4, US-inflation→3, escalation→4; score falls toward 20–22.

Probability shifts from the 22 Jul edition: return to full war +1 (37→38) — the doctrine announcement, the Bushehr/Tabriz strikes and the days-away decision window all point toward escalation-first; regional relapse +1 (9→10) — the embargo is in force and the Yanbu concentration is now quantified at 75%; contained-but-violent –1 (24→23) — the containment equilibrium keeps eroding; mediated pause –1 (10→9) — the framework survives but nothing in the last 24 hours moved it toward acceptance; deal collapse holds at 20. Driver: the same 24 hours produced the war's first Stage-4 leg crossing and its most explicit escalation doctrine.

6 · Watchlist · next 24–72 hours

Political →5 ($4.75) — one to two prints away. AAA confirmed at $4.69 (21 Jul), rising 4–5c/session for six straight prints; the 22–23 Jul prints are pending. A confirmed print at/above $4.75 takes the score to 26 — the first move off 25 in seven sessions.
Stage-4 Threshold B — the 30Y is the last leg, 5.5 bp. The 10Y leg crossed on the 22 Jul close. At the past week's long-end drift the 30Y gap is a matter of sessions; next week's FOMC (28–29 Jul) and any long-duration supply are the catalysts. B tripping is the score's bridge from 25–26 toward the systemic scenarios.
The ceasefire decision window — days. Trump is weighing the 10-day framework against a massive joint operation with Israel; the doctrine announcement raises the cost of each further ship attack. Acceptance opens the first downgrade path in weeks (escalation 5→4); rejection migrates probability to full war and deal collapse. Watch for a named venue and date — still the tell that the proposal is real.
Oil →3 ($95) — $4.82 on a close basis, and the active board is already through. COA prints $95.70; the continuation series rolls toward it. The fastest route remains Yanbu: the embargoed outlet carried ~75% of Saudi exports in early July. One energy-infrastructure event closes the gap in a session.
US-inflation →5 (5Y5Y above 2.30% sustained) — 8.1 bp. Three closes above 2.20% in hand; the advance paused this session — watch whether the pause is consolidation or a top. The 10Y BE is above its pre-war anchor for a second close.
Gas complex — records on both benchmarks. TTF's first double vs pre-war and a fresh Asia LNG record ¥3,499. Watch European/Asian demand-rationing headlines and the next JGLA print — verify, never carry.

7 · Source log · this edition

Tier 1 — primary market data. Bloomberg Terminal extract (US Iran BBG Data.xlsx, restated front-month continuation series). Tickers: CO2/CL2 Comdty (Brent/WTI front-month; the CL2 series remains flagged as a data artifact — its 22 Jul close fell $0.70 while the active CLA rose $2.49); COA/CLA Comdty (active, unscored, quoted for corroboration — COA closed $94.07 and prints $95.70); NGA/TZTA/JGLA Comdty (JGLA printed FRESH 22 Jul at ¥3,499 — war-era record; no 23 Jul print); USGG2YR/5YR/10YR/20YR/30YR Index; USYC2Y10; USGGBE10; USGG5Y5Y; SOFRRATE (lagged, 21 Jul); MOVE and VIX (22 Jul closes; 23 Jul lagged); DXY; AUTMUSAG (AAA pump — score reference; latest print 21 Jul $4.69; 22–23 Jul pending) and USRFRUSA (DOE regular spot, weekly — corroboration; 20 Jul print $4.001).
Tier 1 — news and institutional. CENTCOM statement via JPost / Al Jazeera / Liveuamap (11th consecutive night of strikes, targets, 8:15pm ET completion), Axios (Trump bridge/power-plant doctrine; ceasefire framework status — received, unaccepted, decision within days; air-power deployments; IDF posture), Washington Post / CNN (doctrine coverage), CBS (fourth US service member identified), Seatrade Maritime citing Kpler (~75% of Saudi crude exports via Yanbu in H1 July) and JMIC (30 Hormuz transits 17–19 Jul vs 138/day pre-war), straits.live (day count, transits ~17% of typical on the revised 19 Jul count, 443–444 anchored, 70 AIS-dark in 24h vs 46.1 avg, 8× war-risk cover, six P&I; withdrawals, carrier rerouting), Windward, Federal Reserve calendar / Mariemont Capital (FOMC 28–29 Jul; 9 Jul 30Y auction cleared 5.06% with a 0.3 bp stop-through).
Tier 3 — state media (labelled). Iranian state TV (air defenses active over Tehran) and IRGC-affiliated Tasnim (explosions in Bushehr County) are labelled Tier 3 and used only where corroborated by CENTCOM / JPost / Al Jazeera reporting; no Tier-3 claim is used for anything market-moving. IRNA, Mehr, Press TV used only with explicit role labels.

8 · On-demand update protocol

#	Step	Detail
1	Refresh the Bloomberg extract	Parse the latest dated row (23 Jul) as intraday; reclassify 22 Jul as a final close; re-map columns via the robust scan (front-month CO2/CL2; both gasoline series; JGLA checked fresh — printed 22 Jul ¥3,499, flagged rather than carried; MOVE/VIX 23 Jul lagged, 22 Jul closes carried and labelled; SOFR lagged 21 Jul).
2	Recompute deltas	d/d vs the 22 Jul close; w/w vs the close five trading sessions back (16 Jul this edition); vs-pre-war vs the 27 Feb 2026 anchor (re-verified, unchanged).
3	Re-evaluate the six channels	Market channels move on confirmed closes only — all held: oil 2 (close \$90.18, under \$95); Treasury 5 (30Y 5.1448% above 5.00%; MOVE 76.31 above 75); US-inflation 4 (5Y5Y 2.219%, under 2.30%); political 4 (AAA \$4.69 confirmed, under \$4.75). Maritime/escalation event-based, both maxed.
4	Reconcile against the prior edition	The US session again marked up through the Asia snapshot, but modestly: Brent 22 Jul intraday \$89.58 → close \$90.18 (+\$0.60); 10Y 4.630% → 4.6545% (+2.5 bp); 30Y 5.139% → 5.1448% (+0.5 bp); TTF €60.39 → €62.54 (+€2.15); 5Y5Y 2.226% → 2.219% (–0.7 bp); MOVE 74.67 (carried) → 76.31 close.
5	Update scenarios and watchlist	Re-rank catalysts: political→5 (one to two pending prints, 6c), Stage-4 B (30Y last leg, 5.5 bp), oil→3 (\$4.82 on a close basis; active board through \$95; Yanbu the fast route), US-inflation→5 (8.1 bp, paused); full war 38% modal; FOMC 28–29 Jul enters the window.

9 · Methodology

Shock-score scale. Six transmission channels (maritime denial, oil price shock, US inflation impulse, Treasury stress, political stress, escalation risk), each 0–5, summed to 0–30. Bands: 0–7 watch · 8–14 stress · 15–21 systemic-risk watch · 22–30 crisis. Market/economic channels move only on a confirmed close through a trigger; escalation-risk is event-based. **Hysteresis note:** upgrades fire on a sustained break; downgrades only on a sustained reversal past a wider threshold — deliberately, to avoid whipsawing. Treasury (5) was held through 15–17 Jul on hysteresis when MOVE fell below 75; as of the 22 Jul close both downgrade legs fail simultaneously (30Y 5.1448% vs the 5.00% leg; MOVE 76.31 vs the 75 leg) — the hold is fully fundamentals-based. **Scale cap:** maritime and escalation are both at 5/5, so further geopolitical deterioration — including the doctrine announcement and the Houthi embargo — cannot raise the score; only the four market channels can. A flat 25 must not be read as stability.
Gasoline series. Political-stress is scored on AUTMUSAG (AAA all-grades retail pump; pre-war \$3.52, peak \$5.18, latest confirmed print \$4.69 on 21 Jul — a sixth consecutive rise) for continuity; the 22–23 Jul prints are pending in the extract and the channel holds until they are confirmed. USRFRUSA (DOE regular-grade retail spot; pre-war ~\$2.94, peak \$4.50, latest \$4.001 on 20 Jul) is tracked alongside. See the chart in section 1.
Pre-war anchor (27 Feb 2026 close). Brent \$72.48; WTI \$67.02; 2Y 3.375%; 5Y 3.502%; 10Y 3.938%; 30Y 4.611%; 2s10s +55.64 bp; 5Y5Y 2.142%; 10Y BE 2.257%; MOVE 73.38; VIX 19.86; DXY 97.608; gasoline (AAA) \$3.52; Henry Hub \$3.06; TTF €31.23; Asia LNG ¥1,669. (Re-verified — unchanged.) Brent +25.8%, WTI +26.0%, TTF +101.4%, Asia LNG +109.6%; the 30Y (+53 bp), 10Y (+71 bp), 5Y5Y (+7.6 bp), 10Y BE (+2.6 bp), MOVE (+2.93) and DXY (+3.44) all sit above their anchors; VIX and US Henry Hub remain below pre-war — the vol complex is following the level re-pricing on the rates side only.
Intraday caveat. The latest dated row is a Singapore-AM intraday snapshot; US-hours trading and headlines set the close (recent reconciliation gaps on Brent: +\$1.99, +\$4.01, +\$2.46, –\$0.90, +\$1.91, +\$0.60). The CL2 WTI series remains flagged as a data artifact against the active CLA contract; WTI levels are read off the active board pending resolution. Market-channel triggers are evaluated on confirmed closes; escalation-risk is event-based. Absolute levels use the restated continuation series and are not directly comparable with pre-restatement editions, though the directional analysis is continuous.
