

## HEADLINE JUDGMENT

Note: 7 Jul figures are intraday prints; 6 Jul is now a final close (\$72.24 Brent). Bloomberg's restated continuation series (front-month CO2/CL2) in force; two gasoline series tracked (AUTMUSAG / AAA pump — score reference; USRFRUSA / DOE spot — corroboration). **Score HOLDS at 19/30 for a third session — a quiet consolidation.** The stand-down holds, strait traffic keeps recovering, and the deal grinds on in contested implementation with the talks paused for Khamenei's funeral (through ~9 Jul; the last indirect round wrapped with little visible progress). **Oil is pinned near pre-war by a building supply glut:** Brent bounced to \$72.95 intraday (just above the \$72.48 anchor) but the confirmed closes sit at/just below it, and the structural bias is down — OPEC+ approved another ~188 kbpd hike for August on Sunday, Saudi exports are back near pre-war and the UAE at record output (bypassing the strait via the Habshan–Fujairah pipeline), the Brent curve flipped into contango, and Citi now eyes \$60 by year-end. Oil holds 1; WTI \$69.27. **The one macro flag:** the 30Y crossed 5.00% intraday (5.0006%) — but with MOVE low at 65.76 (and the 6 Jul close 4.98%), it is an orderly term-premium grind, not stress, so Treasury holds 4 (the →5 trigger needs a confirmed close >5.00% with MOVE >75). 5Y5Y eased to 2.19% off the 2.20% line (US-inflation 3); the dollar held below 101; maritime 4 (traffic recovering — Japan-linked and Saudi vessels exited Monday — but well below pre-war, central lanes mined, Iran controlling routing); political 4 (gasoline easing). VIX 15.57. The swing is the post-funeral talks and whether the glut drives a clear sub-\$70 break (oil →0). Sequencing 19 → 19 → 19.

### Oil and natural gas — Bloomberg front-month / active

7 Jul 2026 readings are intraday prints; 6 Jul and earlier are final closes (restated continuation series; front-month CO2/CL2). d/d deltas are 7 Jul intraday vs 6 Jul close; w/w deltas are vs 30 Jun close.

| Benchmark                     | Intraday 7 Jul                                                                                                                                                                  | Δ d/d                                                              | Δ vs pre-war close (27 Feb)                                                  | BBG ticker             |

## Cross-asset stress and political-transmission gauges — Bloomberg

| Indicator                                                     | Latest       | As of           | Δ vs pre-war                  | Interpretation                                                                                                                                        |
|---------------------------------------------------------------|--------------|-----------------|-------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------|
| DXY (dollar index)                                            | 100.86       | 7 Jul intraday  | +3.26 (from 97.61)            | Holding below 101 (−0.32 w/w) after the soft June jobs report. Still firm on the hawkish FOMC; no Stage-4 break.                                      |
| MOVE Index (bond vol)                                         | 65.76        | 6 Jul (lagged)  | −7.62 (from 73.38)            | Low — the 30Y touching 5.00% is orderly term premium, so the Treasury →5 trigger (MOVE >75) is far off. Far below the 130 Stage-4 level.              |
| VIX (equity vol)                                              | 15.57        | 6 Jul (lagged)  | −4.29 (from 19.86)            | Well below pre-war — equities calm (Dow at record highs); the strait grind is not a risk event.                                                       |
| Gasoline · AUTMUSAG (AAA, all-grades pump) — score reference  | \$4.41 /gal  | 3 Jul (latest)  | +\$0.89 (from \$3.52, +25%)   | The political-stress reference (pre-war \$3.52, peak \$5.18). Below the \$4.75 threshold, easing steadily; sub-pre-war crude should feed more relief. |
| Gasoline · USRFRUSA (DOE, regular-grade spot) — corroboration | \$3.831 /gal | 29 Jun (weekly) | ~+\$0.89 (from ~\$2.94, +30%) | Regular-grade spot; peak \$4.50 (11 May). Corroborates the AAA read — ~30% above pre-war and falling.                                                 |

## US retail gasoline — the two tracked series, 2026 year-to-date

AUTMUSAG (AAA all-grades retail pump, daily) is the political-stress score reference (pre-war \$3.52, peak \$5.18, latest \$4.41); USRFRUSA (DOE regular-grade retail spot, weekly) is the complementary gauge (pre-war ~\$2.94, peak \$4.50, latest \$3.831). Both spiked from the 28 Feb war start and have retraced most of the move to ~25–30% above their respective pre-war levels; with Brent near pre-war and a supply glut building, the pump price has further room to fall (with the usual refining/retail lag).

## Strait operational state

| Indicator               | Current reading                                                                                                                                                                                                                 | Source                    |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------|
| Stand-down holding      | No new US–Iran strikes; the 29 Jun stand-down continues to hold. "Sporadic ceasefire violations... [but] shipping traffic has steadily recovered."                                                                              | Al-Monitor / GEF          |
| Traffic recovering      | LSEG: 10 Japan-linked vessels exited the strait Monday; a supertanker carrying Saudi crude departed for South Korea over the weekend. Volumes still well below the 130–140 ships/day pre-war baseline; central lanes mined.     | Al-Monitor / LSEG         |
| Talks paused (funeral)  | The indirect Doha round wrapped "with little visible progress"; talks are paused for Khamenei's funeral through ~9 Jul (Islamabad a frontrunner to host the next round). Routing / toll / nuclear files open.                   | The National / GEF        |
| OPEC+ output hike (Sun) | OPEC+ approved a ~188 kbpd increase for August, continuing the unwind of curbs; Saudi (~90% of pre-war) and the UAE (record output, bypassing the strait) are ramping. The physical market has flipped into surplus (contango). | The National / Al-Monitor |
| Routing dispute         | Iran continues to press control of the southern lane and post-60-day tolls; France and the UK have offered a freedom-of-navigation naval mission that Iran opposes. The core maritime/escalation friction.                      | GEF / Reuters             |
| Macro overlay           | The 30Y touched 5.00% (term premium/supply) with MOVE low; a soft June jobs report keeps the dollar below 101. The 17 Jun hawkish FOMC still frames policy.                                                                     | Bloomberg / Fed           |

## 2 · US economic shock — analysis with bond yields

The US economic shock holds at **19/30**, the low of the post-deal period, for a third session. The energy shock has fully unwound — oil is pinned near pre-war and now capped by an OPEC+/Gulf supply glut — and the geopolitics are in a holding pattern (stand-down intact, talks paused for the funeral). The one moving part is the long end, which touched 5.00% on term premium with low bond vol — an orderly, Fed-anchored rise rather than stress. No Stage-4 signal.

## 2.1 · Bond-yield transmission

7 Jul yields are intraday; d/d vs 6 Jul close, w/w vs 30 Jun. **Score held at 19; no channel moved on the 6 Jul close.** The 30Y crossed 5.00% (5.0006%) intraday on term premium/supply, the curve steepened to +36 bp, and 5Y5Y eased off the 2.20% line — all with MOVE low at 65.76. Brent bounced to \$72.95 but is glut-capped.

**(i) Inflation anchor — off 2.20%; held at 3.** 5Y5Y forward at 2.19% eased back from the 2.20% upgrade line, +5 bp above the 2.142% pre-war anchor; 10Y breakeven 2.24% is near pre-war. US-inflation holds at 3 — a sustained break >2.20% would take it to 4; a sustained close at/below 2.142% to 2.

**(ii) Long-end — touched 5.00%; Treasury Fed-pinned at 4, →5 watch (vol leg dormant).** 30Y hit 5.0006% intraday (6 Jul close 4.98%) but MOVE is low at 65.76 — an orderly term-premium rise, not funding stress. The →5 needs a confirmed 30Y close >5.00% with MOVE >75; the vol leg is far off. 10Y at 4.48% is 17 bp below the 4.65% trigger.

**(iii) Oil — glut-capped near pre-war; held at 1.** Closes 2 Jul \$72.17, 3 Jul \$72.32, 6 Jul \$72.24; 7 Jul intraday \$72.95 (a modest bounce); WTI \$69.27. OPEC+'s Sunday hike, the Saudi/UAE ramp and a contango curve cap crude near pre-war. Oil holds at 1; a clear, sustained break below pre-war (sub-\$70 Brent) takes it to 0, a re-closure / strikes back to 3.

## 2.2 · What would push the shock to Stage 4

Stage 4 is a credit/auction event. The 30Y touched 5.00% but with low bond vol, so Threshold B is on watch rather than triggering.

**Threshold A · 13 May 30Y auction. Historical.** Cleared at 5.050%. With 30Y ~5.00%, the next long-bond auction is the test if the term-premium rise extends.

**Threshold B · 30Y above 5.20% with 10Y above 4.65%. On watch.** 30Y 5.00% is 20 bp below the 5.20% trigger; 10Y 4.48% is 17 bp below 4.65%.

**Threshold C · MOVE above 130. Contained.** MOVE 65.76 and VIX 15.57 are both well below pre-war — the long-end move is orderly. Far below Stage-4 levels.

## 2.3 · Cross-asset

The market picture is settled and, on the energy side, past pre-war: Brent at the anchor and capped by a supply glut (contango, Citi \$60), WTI just above its anchor, breakevens near/below pre-war, VIX 15.57 with the Dow at record highs. The score's residual 19 is now almost entirely the unresolved geopolitics — a mined, Iran-controlled strait (maritime 4) and a paused-talks escalation (3) — plus a Fed-pinned Treasury 4 (long end at 5.00% on term premium) and the lagging gasoline channel. Gasoline keeps grinding lower on both tracked series.

## 3 · Shock score

Total: **19/30**. Band thresholds: 0–7 watch · 8–14 stress · 15–21 systemic-risk watch · 22–30 crisis.

| Channel              | Score | Rationale                                                                                                                                                                                                                                                                                                       | Triggers                                                                                                            |
|----------------------|-------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------|
| Maritime denial      | 4/5   | <b>Held at 4.</b> Traffic is recovering (Japan-linked and Saudi vessels exited Monday) but still well below the 130–140/day pre-war baseline, the central lanes are mined, and Iran controls the routing (southern lane, tolls). Not 5 — no formal re-closure; →3 nearing but not met (not verified mine-free). | ↑ strait re-closed / blockade reinstated → to 5. ↓ traffic >25% normal for 10 sessions (verified mine-free) → to 3. |
| Oil price shock      | 1/5   | <b>Held at 1.</b> Closes 2–6 Jul at/just below the \$72.48 anchor; 7 Jul intraday \$72.95 (a modest bounce). OPEC+'s Sunday hike, the Saudi/UAE ramp and a contango curve cap crude near pre-war. WTI ~\$2.3 above its anchor.                                                                                  | ↑ Brent >\$95 sustained → to 3. ↓ clear break below pre-war (sub-\$70 Brent) sustained → to 0.                      |
| US inflation impulse | 3/5   | <b>Held at 3.</b> 5Y5Y 2.19% eased off the 2.20% upgrade line, +5 bp above the 2.142% pre-war anchor; 10Y BE 2.24% (near pre-war).                                                                                                                                                                              | ↑ 5Y5Y sustained >2.20% → to 4. ↓ 5Y5Y sustained at/below the 2.142% pre-war anchor → to 2.                         |
| Treasury stress      | 4/5   | <b>Held at 4 — Fed-pinned, →5 vol leg dormant.</b> 30Y touched 5.0006% intraday (6 Jul close 4.98%) but MOVE is low at 65.76 — orderly term premium, not stress. The →5 needs a confirmed close >5.00% with MOVE >75.                                                                                           | ↑ 30Y close >5.00% with MOVE >75 → to 5. ↓ 30Y close <4.50% with MOVE <65 → to 3.                                   |
| Political stress     | 4/5   | <b>Held at 4.</b> Scored on AUTMUSAG (AAA pump): \$4.41 (3 Jul), below the \$4.75 threshold and easing toward the \$3.52 pre-war. The DOE regular spot (\$3.831) corroborates; glut-capped crude should feed further relief.                                                                                    | ↑ gasoline >\$4.75 sustained → to 5. ↓ toward the \$3.52 pre-war level → to 3.                                      |
| Escalation risk      | 3/5   | <b>Held at 3.</b> The stand-down holds (no new strikes) and traffic is recovering — so not back to 4; but the talks are paused for the funeral (through ~9 Jul) after an indirect round with "little visible progress," and the routing/toll dispute is live — so not to 2.                                     | ↑ fresh strikes / re-closure / deal collapse → back to 4–5. ↓ talks advance + sustained normalization → to 2.       |
| TOTAL                | 19/30 | <b>Systemic-risk-watch band — held at 19 (third session).</b> A quiet consolidation: the energy shock is unwound and glut-capped, the stand-down holds, the talks are paused. The residual is the mined strait, the Fed-pinned Treasury, the gasoline lag and a contested, paused-talks escalation.             |                                                                                                                     |

## 4 · What's changed since the last edition (6 Jul → 7 Jul AM)

**Score holds at 19/30 for a third session.** A quiet consolidation — no channel moved on the 6 Jul close. Source: Bloomberg / AI-Monitor / The National.

**Oil glut-capped; modest bounce.** Brent \$72.95 (+\$0.71 d/d) bounced just above the anchor, but OPEC+'s Sunday ~188 kbpd hike, the Saudi/UAE ramp and a contango curve cap it; Citi eyes \$60. Oil holds at 1. Source: The National / AI-Monitor.

**30Y touched 5.00%.** The long end hit 5.0006% intraday on term premium/supply, but MOVE is low (65.76) — orderly, not stress. Treasury holds at 4 (→5 vol leg dormant). Source: Bloomberg.

**Stand-down holds; traffic recovering.** No new strikes; Japan-linked and Saudi vessels exited the strait Monday. Escalation holds at 3, maritime at 4. Source: Al-Monitor / LSEG.

**Talks paused.** The indirect Doha round wrapped with little visible progress; the next round is paused for Khamenei's funeral through ~9 Jul. Escalation stays at 3 (not to 2). Source: The National / GEF.

## 5 · Scenario map · next 7 to 30 days

| Scenario                                           | P   | Description                                                                                                                                                                     | Market path                                                                                                    |
|----------------------------------------------------|-----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------|
| Deal holds — talks resume, normalization continues | 52% | The stand-down holds, the talks resume post-funeral, traffic keeps rebuilding and the asset/routing mechanics advance; the OPEC+/Gulf glut keeps crude soft. Base case.         | Brent \$58–72; 30Y 4.7–5.05%; MOVE <70; score eases toward the stress band (8–14).                             |
| Slow / partial implementation                      | 38% | Ceasefire holds but normalization is slow and stop-start — the routing/toll fight, the mined central channel and the nuclear file persist even as crude drifts lower on supply. | Brent \$62–74; yields firm; residual risk premium ~\$0–2/bbl; maritime 4 and a contested escalation 3 persist. |
| Implementation breakdown (60-day window)           | 6%  | The routing/toll or IAEA terms snag, or the asset mechanics stall, or Iran hardens the strait — stalling the deal without full-scale war.                                       | Brent \$78–92; risk premium rebuilds toward \$6–12/bbl; escalation back to 4; oil re-rates up.                 |
| Ceasefire breakdown / re-escalation                | 3%  | The stand-down fails and strikes resume — via Hormuz routing, the France/UK mission, US bases or Lebanon — despite the MOU.                                                     | Brent \$90–118; 10Y >4.65%; 30Y >5.20%; risk-off; score back toward the crisis band.                           |
| Major regional relapse                             | 1%  | Multi-front relapse with the strait re-closed/re-mined. Tail risk, held down by the holding stand-down.                                                                         | Brent \$150+; emergency policy; HY spreads >500 bp; potential dollar disorder.                                 |

Probability shifts from the 6 Jul edition: deal-holds normalization +1 (51→52), implementation-breakdown –1 (7→6); slow/partial (38%), ceasefire-breakdown (3%) and regional relapse (1%) held. Driver: the holding stand-down, the recovering traffic and the building supply glut reinforce the constructive and slow paths and trim the near-term breakdown tail; the paused talks and the routing dispute keep the slow path the second-most-likely. The OPEC+ glut weighs on crude regardless.

## 6 · Watchlist · next 24–72 hours

**Talks resume post-9 Jul — the swing.** The round is paused for the funeral after “little visible progress”; whether it reconvenes and advances the routing / toll / nuclear files takes escalation toward 2, or a collapse back to 4.

**Oil — oil to 0.** Brent ~\$73 but glut-capped (OPEC+ hike, Saudi/UAE ramp, contango, Citi \$60); a clear, sustained break below pre-war (sub-\$70) takes oil 1→0. A re-closure / strikes re-rates it up.

**Treasury long-end — →5 watch.** 30Y touched 5.00% (MOVE 65.76 low); a confirmed 30Y close >5.00% with MOVE >75 would take Treasury 4→5. The next long-bond auction and CPI are the drivers.

**Routing dispute / France-UK mission.** Iran's control of the southern lane and tolls, and the France/UK naval-mission friction, are the core maritime and escalation risk — and a re-escalation route.

**Strait traffic / mines — maritime to 3.** Traffic is recovering (Japan/Saudi vessels) but well below pre-war under mined central lanes; a sustained >25% verified mine-free run takes maritime 4→3.

**5Y5Y / gasoline.** 5Y5Y 2.19% (US-inflation →4 on a sustained break >2.20%); AAA \$4.41 and DOE \$3.831 (political →3 as the pump price grinds toward the \$3.52 pre-war).

## 7 · Source log · this edition

**Tier 1 — primary market data.** Bloomberg Terminal extract (US\_Iran\_BBG\_Data.xlsx, restated front-month continuation series). Tickers: CO2/CL2 Comdty (Brent/WTI front-month); NGA/TZTA/JGLA Comdty; USGG2YR/5YR/10YR/20YR/30YR Index; USYC2Y10; USGGBE10; USGG5Y5Y; SOFRRATE; MOVE; VIX; DXY; AUTMUSAG (AAA pump — score reference) and USRFRUSA (DOE regular spot, weekly — corroboration).

**Tier 1 — news and institutional.** Al-Monitor, The National, Trading Economics, GlobalSecurity, Reuters, LSEG, Citi, CNBC, Bloomberg; OPEC+, US State Dept, CENTCOM, JMIC, IMO, Federal Reserve. The OPEC+ ~188 kbpd August hike, the Saudi/UAE supply ramp, the contango flip, the recovering strait traffic (Japan-linked / Saudi vessels), the funeral talks-pause and the routing dispute via Al-Monitor / The National / LSEG / GEF.

**Tier 3 — state media (labelled).** Iranian statements (southern-lane control, toll push, IRGC routing directives) are labelled and corroborated against Reuters / Al-Monitor / AP; IRNA, Tasnim, Mehr, Press TV, Xinhua, TASS used only with explicit role labels and never as sole sourcing for a market-moving claim.

## 8 · On-demand update protocol

| # | Step                                     | Detail                                                                                                                                                                                                                                         |
|---|------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Refresh the Bloomberg extract            | Parse the latest dated row as intraday; reclassify the prior session as a final close (6 Jul); re-map columns via the robust scan (oil front-month CO2/CL2; both gasoline series; DXY col98).                                                  |
| 2 | Recompute deltas                         | d/d vs prior close; w/w vs the close five trading sessions back (w/w base = 30 Jun this edition); vs-pre-war vs the 27 Feb 2026 anchor.                                                                                                        |
| 3 | Re-evaluate the six shock-score channels | Market channels move on a confirmed close (none moved; oil holds 1, glut-capped near pre-war; the 30Y 5.00% touch is intraday with low MOVE, so Treasury holds 4). Escalation-risk is event-based, held at 3 (stand-down holds; talks paused). |
| 4 | Reconcile against the prior edition      | Flag intraday-vs-close divergences (this edition: the 6 Jul close firmed Brent to \$72.24 and crept the 30Y to 4.98%).                                                                                                                         |
| 5 | Update scenarios and watchlist           | Re-rank near-term catalysts; lead with the post-9 Jul talks, oil (→0 on a sub-\$70 break), the Treasury →5 watch and the routing dispute.                                                                                                      |

## 9 · Methodology

**Shock-score scale.** Six transmission channels (maritime denial, oil price shock, US inflation impulse, Treasury stress, political stress, escalation risk), each 0–5, summed to 0–30. Bands: 0–7 watch · 8–14 stress · 15–21 systemic-risk watch · 22–30 crisis. Market/economic channels move on a confirmed close through a trigger — this edition oil held at 1 (glut-capped near pre-war; the 7 Jul bounce is intraday) and Treasury held at 4 (the 30Y 5.00% touch is intraday with low MOVE, short of the →5 trigger). Escalation-risk is event-based, held at 3 (stand-down holds; talks paused). A hawkish FOMC continues to pin Treasury at 4.

**Gasoline series.** Political-stress is scored on AUTMUSAG (AAA all-grades retail pump; pre-war \$3.52, peak \$5.18, latest \$4.41) for continuity. USRFRUSA (DOE regular-grade retail spot; pre-war ~\$2.94, peak \$4.50, latest \$3.831) is tracked alongside and corroborates (~25–30% above pre-war, easing). See the chart in section 1.

**Pre-war anchor (27 Feb 2026 close).** Brent \$72.48; WTI \$67.02; 2Y 3.375%; 5Y 3.502%; 10Y 3.938%; 30Y 4.611%; 2s10s +55.64 bp; 5Y5Y 2.142%; 10Y BE 2.257%; MOVE 73.38; VIX 19.86; DXY 97.608; gasoline (AAA) \$3.52; Henry Hub \$3.06; TTF €31.23; Asia LNG ¥1,669. (Re-verified — unchanged.) Brent is at the anchor and WTI just above it; 5Y5Y (+5 bp) sits above; 10Y breakevens, MOVE and VIX are near/below it; the hawkish Fed holds the front end, with the long end at 5.00% on an orderly term-premium rise and the dollar below 101 on soft jobs.

**Intraday caveat.** The latest dated row is a Singapore-AM intraday snapshot; US-hours trading and headlines set the close. This edition's examples: Brent's bounce to \$72.95 and the 30Y's 5.00% touch are intraday — the oil and Treasury channels are read on confirmed closes. Escalation-risk is event-based. Absolute levels use the restated continuation series and are not directly comparable with pre-restatement editions, though the directional analysis is continuous.
