

HEADLINE JUDGMENT

Note: 15 Jul figures are intraday prints; 14 Jul is now a final close (\$83.32 Brent). Bloomberg's restated continuation series (front-month CO2/CL2) in force. **Score rises to 25/30 as US INFLATION IMPULSE UPGRADES 3→4 — the second market-channel upgrade in two sessions.** The trigger required a **sustained** break, and 5Y5Y has now closed above the 2.20% line on two consecutive sessions (13 Jul 2.2061%, 14 Jul 2.2086%; 15 Jul intraday 2.2091%) — the war premium is now durably repricing forward inflation, not just spot oil. Treasury stays at 5 (the 14 Jul close held both legs: 30Y 5.104%, MOVE 75.03). **The one relief: the acute panic stabilised.** After Monday's break, bond vol cooled (MOVE 77.77 → 75.03), VIX eased (17.16 → 16.50), and the 10Y slipped back to 4.58% — so Stage-4 Threshold B did NOT trip (the 10Y is 7 bp below 4.65% again). Oil is the striking hold-out: Brent \$83.88 intraday (+\$11.40, +15.7% vs pre-war), yet still \$11 short of the \$95 oil→3 trigger. The surface stays violent — Trump reimposed the naval blockade of Iranian ports (Monday's Brent settle +9.6%, its biggest day in six years), Iran disabled two UAE tankers and hit five Gulf states — **but a diplomatic track has quietly re-opened underneath it:** Oman has drafted a two-route strait-management proposal and the US and Iran "agreed to continue talks." Maritime and escalation stay maxed at 5/5. Political 4 (AAA \$4.46, the pump lag persists). Four of six channels are now at 4–5. Sequencing 23 → 24 → 25.

Oil and natural gas — Bloomberg front-month / active

15 Jul 2026 readings are intraday prints; 14 Jul and earlier are final closes (restated continuation series; front-month CO2/CL2). d/d deltas are 15 Jul intraday vs 14 Jul close; w/w deltas are vs 8 Jul close.

Benchmark	Intraday 15 Jul	Δ d/d	Δ vs pre-war close (27 Feb)	BBG ticker
Brent front-month	\$83.88 /bbl	+\$0.56 (+\$6.31 w/w)	from \$72.48 (+15.7%) — ~\$11.4/bbl premium; the \$95 oil→3 trigger is \$11.1 away	CO2 Comdty
Brent · 14 Jul close (carried)	\$83.32 /bbl (−\$0.20 vs my intraday)	held the Monday surge; Brent's Monday settle (+9.6%) was its biggest single-day gain in six years		CO2 Comdty (Close)
WTI front-month	\$79.12 /bbl	+\$0.44 (+\$5.85 w/w)	from \$67.02 (+18.1%) — near \$80	CL2 Comdty
Brent–WTI spread	\$4.76 /bbl	+\$0.12 d/d	wide	derived
Henry Hub natural gas	\$2.92 /MMBtu	+\$0.02 (−\$0.29 w/w)	from \$3.06 (−4.7%) — US gas BELOW pre-war (domestic); not Hormuz-exposed	NGA Comdty
TTF Dutch gas (active)	€53.90 /MWh	+€0.94 (+€4.88 w/w)	from €31.23 (+72.6%) — still climbing; 20% of global LNG transits the strait	TZTA Comdty
Japan/Asia LNG (14 Jul close)	¥2,685	+¥3 d/d	from ¥1,669 (+60.9%) — stabilising ~¥2,685 after the ¥2,852 peak	JGLA Comdty
US reimposes port blockade	Trump reimposed the US naval blockade of Iranian ports (from Tue) — Brent settled +9.6% Monday to \$83.30, its biggest single-day percent gain in over six years.			CENTCOM / CNN
IEA · supply 9.4 mb/d below pre-war	The "glut shield" is thinner than assumed; ADNOC cut its Aug Murban OSP to \$80.01 (from \$101.48). Iranian barrels stranded at sea as Chinese buyers switch to Iraqi/UAE/Qatari crude.			IEA / ADNOC

US Treasuries and inflation expectations — Bloomberg

15 Jul 2026 yields are intraday. d/d deltas are 15 Jul intraday vs 14 Jul close; w/w deltas are vs 8 Jul close. **The 14 Jul close was the second consecutive 5Y5Y close above 2.20% — firing US-inflation→4 — while bond vol cooled from Monday's spike.**

Tenor	Yield (%) — intraday 15 Jul	Δ d/d (bp)	Δ w/w (bp)	Δ vs pre-war (bp)	BBG ticker
2-year UST	4.19	−0.6	−3.1	+81 (from 3.37%) — eased as the panic stabilised	USGG2YR Index
5-year UST	4.32	−0.5	−1.2	+81 (from 3.50%)	USGG5YR Index
10-year UST	4.58	−0.6	+0.4	+65 (from 3.94%) — slipped back to 7 bp below the 4.65% trigger	USGG10YR Index
30-year UST	5.10	−0.4	+2.8	+49 (from 4.61%) — holds above 5.00%; Treasury stays 5	USGG30YR Index
2s10s spread	+39 bp	+0.0	+3.5	−16 (re-steepened)	USYC2Y10 Index
10Y breakeven inflation	2.26	+0.1	−0.9	0 (from 2.257%) — at pre-war	USGGBE10 Index
5Y5Y forward inflation	2.21	+0.0	+2.9	+7 (from 2.14%) — 2nd consecutive close >2.20% (2.2086%): US-inflation→4 FIRED	USGG5Y5Y Index
SOFR (lagged print)	3.63	—	—	series lags	SOFRRATE Index

Cross-asset stress and political-transmission gauges — Bloomberg

Indicator	Latest	As of	Δ vs pre-war	Interpretation
DXY (dollar index)	100.79	15 Jul intraday	+3.18 (from 97.61)	Eased toward 100.8 — no strong haven bid; the dollar is not the stress valve. No Stage-4 break.
MOVE Index (bond vol)	75.03	14 Jul (lagged)	+1.65 (from 73.38)	Cooled from Monday's 77.77 spike but still ABOVE the 75 trigger and above pre-war — the Treasury→5 conditions persist. Far below the 130 Stage-4 level.
VIX (equity vol)	16.50	14 Jul (lagged)	−3.36 (from 19.86)	Eased from 17.16 — equities stabilised after Monday, still below pre-war. The repricing is concentrated in rates/oil, not equities.
Gasoline · AUTMUSAG (AAA, all-grades pump) — score reference	\$4.46 /gal	13 Jul (latest)	+\$0.94 (from \$3.52, +27%)	The political-stress reference (pre-war \$3.52, peak \$5.18). 29 cents below the \$4.75 threshold; the \$11 crude premium is only slowly passing through (pump lag).
Gasoline · USRFRUSA (DOE, regular-grade spot) — corroboration	\$3.855 /gal	13 Jul (weekly)	~+\$0.92 (from ~\$2.94, +31%)	Regular-grade spot; ticked up from \$3.777 — the first weekly print to catch the re-escalation. Confirms the pump is turning up.

US retail gasoline — the two tracked series, 2026 year-to-date

AUTMUSAG (AAA all-grades retail pump, daily) is the political-stress score reference (pre-war \$3.52, peak \$5.18, latest \$4.46); USRFRUSA (DOE regular-grade retail spot, weekly) is the complementary gauge (pre-war ~\$2.94, peak \$4.50, latest \$3.855 — up from \$3.777, the first weekly print to catch the re-escalation). Both lines have turned up, but neither yet fully reflects the \$11/bbl crude premium — the refining/retail lag means the pump should keep climbing toward the \$4.75 political→5 threshold.

Strait operational state

Indicator	Current reading	Source
US reimposes port blockade	Trump reimposed the naval blockade of Iranian ports (from 4pm ET Tue), on top of a fourth strike wave. Brent settled +9.6% Monday (\$83.30) — its biggest single-day gain in six years.	CNN / CENTCOM
Iran disables two UAE tankers; hits 5 states	The IRGC "struck and disabled" two "rogue supertankers" (UAE-owned, in Omani waters, one crew killed) that it said used a "mined route"; Iran struck US bases in Kuwait, Bahrain, Jordan, Oman and Qatar. Kuwait intercepted 2 ballistic missiles and 13 drones.	IRGC / UAE / CNN
Diplomacy re-opens — the key nuance	Araghchi met Oman's FM; Oman has drafted a proposal to manage the strait via two separately controlled routes. Trump said the US and Iran "agreed to continue talks," while calling the ceasefire "over"; the US says talks can't progress until safe passage is assured.	CNN / Reuters
Traffic still a trickle	MarineTraffic: ~15 vessels transited in a recent 24h window (vs ~110/day pre-war); Kpler counted six on Sunday. GPS spoofing complicates counts. CENTCOM insists the strait is "open."	MarineTraffic / Kpler / CENTCOM
Institutional condemnation	The IMO condemned the "reckless" attacks on shipping; NATO's Turkey summit declaration called on Iran to "fully respect freedom of navigation in the Strait of Hormuz."	IMO / NATO
Wells Fargo view	"Until something changes with the status of the Strait, the bias remains for higher oil prices and, in turn, higher expected inflation and interest rates, and episodes of equity price volatility."	Wells Fargo II

2 · US economic shock — analysis with bond yields

The US economic shock rises to **25/30** as **US-inflation upgrades 3→4** — the second market-channel upgrade in two sessions, following Treasury on 14 Jul. The war premium, which the market spent a week treating as a contained, growth-negative shock, is now durably repricing forward inflation: 5Y5Y has closed above 2.20% on two consecutive days. The one stabiliser is that Monday's acute bond-vol spike cooled, so Stage-4 Threshold B did not trip. But four of six channels now sit at 4–5, and the two still-moving market channels (oil, political) are both approaching their triggers.

2.1 · Bond-yield transmission

15 Jul yields are intraday; d/d vs 14 Jul close, w/w vs 8 Jul. **US-inflation 3→4; score 24→25.** After Monday's break, Tuesday's close stabilised the acute stress — the front end eased (2Y –3.1 bp w/w), MOVE cooled to 75.03 and VIX to 16.50 — while the structural repricing held: 5Y5Y stuck above 2.20%, the 30Y above 5.00%. Brent extended to \$83.88.

(i) Inflation anchor — UPGRADED to 4. Sustained break confirmed. 5Y5Y forward closed at 2.2061% (13 Jul) and 2.2086% (14 Jul) — two consecutive closes above the 2.20% line — with the 15 Jul intraday at 2.2091%. The trigger's "sustained" condition is met. This matters more than the level suggests: for a week the market read the oil shock as demand-destructive (5Y5Y was FALLING while spot oil rose); that has now reversed — forward inflation expectations are climbing with crude. 10Y breakevens (2.26%) are back at pre-war.

(ii) Treasury — stays at 5; panic cooled but conditions persist. The 14 Jul close held both legs (30Y 5.104%, MOVE 75.03 — just above the 75 trigger). MOVE cooled from Monday's 77.77 but remains above 75 and above its pre-war level, so the channel stays at 5. A sustained drop in the 30Y below 5.00% with MOVE below 75 would be needed to revert it to 4 — not in view.

(iii) Oil — \$83.88; still held at 2. Closes 13 Jul \$82.71, 14 Jul \$83.32; 15 Jul intraday \$83.88 (+\$11.40 premium, +15.7% vs pre-war); WTI \$79.12. Despite a reimposed port blockade and six-vessel transit days, Brent is \$11 below the \$95 oil→3 trigger — the residual cushion from spare capacity and bypass pipelines, even with the IEA's 9.4 mb/d deficit. This is the last major market channel yet to upgrade.

2.2 · What would push the shock to Stage 4

Stage 4 is a credit/auction event. Threshold B came within 3 bp on Monday, then eased — it remains the live risk but is not imminent this session.

Threshold A · 13 May 30Y auction. Historical. Cleared at 5.050%. With the 30Y at 5.10%, the next long-bond auction is a genuine demand test at these levels.

Threshold B · 30Y above 5.20% with 10Y above 4.65%. Live (eased). 30Y 5.100% is 10 bp below 5.20%; 10Y 4.584% slipped back to 7 bp below 4.65% (from 3 bp Monday). The panic cooling bought a little room.

Threshold C · MOVE above 130. Elevated, far off. MOVE 75.03 is above pre-war but well below 130. The breakout holds; the level is not yet a Stage-4 signal.

2.3 · Cross-asset

The through-line of the past week — markets pricing a Hormuz closure as survivable — has now fully broken on the rates side. Treasury (Mon) and US-inflation (Tue) have both upgraded; MOVE and breakevens sit above pre-war; the 5Y5Y signal has flipped from falling to rising. What has NOT yet broken is oil (Brent \$84, not \$95) and equities (VIX 16.5, below pre-war) — the residual containment bet now rests entirely on spare capacity and the bypass pipelines holding, and on the Omani two-route proposal delivering a de-escalation. Wells Fargo's framing is apt: until the strait's status changes, the bias is higher oil, higher inflation, higher rates and episodic equity vol. The diplomatic re-opening (Oman's proposal; "talks to continue") is the one genuine off-ramp, and the single most important thing to watch.

3 · Shock score

Total: **25/30 — CRISIS band**. Band thresholds: 0–7 watch · 8–14 stress · 15–21 systemic-risk watch · 22–30 crisis.

Channel	Score	Rationale	Triggers
Maritime denial	5/5	Held at 5 (max). Transits a trickle (~15 in a recent 24h vs ~110/day pre-war; six on Sunday); the US has reimposed the port blockade and Iran disabled two more tankers. Iran and CENTCOM still give conflicting open/closed accounts.	↑ at max. ↓ verified reopening with traffic >25% of normal for 10 sessions → to 3–4.
Oil price shock	2/5	Held at 2 — last market channel yet to upgrade. Brent \$83.88 (+\$11.40, +15.7% vs pre-war); WTI \$79.12. The \$95 trigger is \$11.1 away — the spare-capacity/bypass cushion persists despite the blockade and the IEA's 9.4 mb/d deficit.	↑ Brent >\$95 sustained → to 3. ↓ mediated pause + close back at/below the \$72.48 anchor → to 1.
US inflation impulse	4/5	UPGRADED 3→4 — sustained break confirmed. 5Y5Y closed above 2.20% on two consecutive sessions (2.2061%, 2.2086%; intraday 2.2091%). Forward inflation has flipped from falling to rising with crude — the shock is now read as inflationary.	↑ 5Y5Y sustained >2.30% → to 5. ↓ 5Y5Y sustained back below 2.142% pre-war → to 3.
Treasury stress	5/5	Held at 5. The 14 Jul close held both legs (30Y 5.104% >5.00%, MOVE 75.03 >75). Bond vol cooled from Monday's 77.77 spike but stays above 75 and above pre-war — the stress conditions persist.	↑ at max. ↓ 30Y close <5.00% with MOVE <75 sustained → back to 4.
Political stress	4/5	Held at 4 — →5 building. AAA pump \$4.46 (13 Jul), 29 cents below the \$4.75 threshold; DOE spot ticked up to \$3.855. The \$11 crude premium is only slowly passing through (pump lag) but both series have turned up.	↑ gasoline >\$4.75 sustained → to 5. ↓ toward the \$3.52 pre-war level → to 3.
Escalation risk	5/5	Held at 5 (max). A reimposed US port blockade, a fourth strike wave, Iran disabling two UAE tankers and striking five Gulf states. A diplomatic track (Oman's two-route proposal) has re-opened but the kinetic tempo is unchanged.	↑ at max. ↓ mediated stand-down + talks resume → back to 4–3.
TOTAL	25/30	CRISIS band — 24→25. Two market upgrades in two days. US-inflation joins Treasury above trigger; four of six channels are now at 4–5. The panic cooled (Threshold B eased), but oil (→3 at \$95) and political (→5 at \$4.75) are the next in line. The Omani proposal is the off-ramp.	

4 · What's changed since the last edition (14 Jul → 15 Jul AM)

Score rises to 25/30 — US-INFLATION UPGRADED 3→4. A second consecutive 5Y5Y close above 2.20% (2.2086%) confirmed the sustained break. Source: Bloomberg.

Forward inflation flipped. For a week 5Y5Y fell while oil rose (a growth-negative read); it has now risen above 2.20% with crude — the market reads the shock as inflationary. Source: Bloomberg.

Panic cooled — the one relief. MOVE eased 77.77 → 75.03, VIX 17.16 → 16.50, and the 10Y slipped to 4.58% — so Stage-4 Threshold B did NOT trip (10Y back 7 bp below 4.65%). Treasury stays 5. Source: Bloomberg.

US reimposed the port blockade. Trump reimposed the naval blockade of Iranian ports; Brent's Monday settle jumped 9.6% (biggest day in six years). Iran disabled two UAE tankers and hit five Gulf states. Source: CNN / CENTCOM / IREG.

Diplomacy re-opened — the nuance. Oman drafted a two-route strait-management proposal and the US and Iran “agreed to continue talks,” even as Trump calls the ceasefire “over.” The one genuine off-ramp. Source: CNN / Reuters.

Gasoline turning up on both series. AAA \$4.46; DOE ticked up to \$3.855 (first weekly print to catch the re-escalation). Political stays 4, building toward \$4.75. Source: AAA / DOE.

5 · Scenario map · next 7 to 30 days

Scenario	P	Description	Market path
Omani off-ramp — two-route deal, de-escalation	14%	Oman's two-route proposal is accepted, safe passage is assured and strikes halt; talks resume. The one genuine off-ramp, now on the table.	Brent \$72–82; MOVE back <75; Treasury/US-inflation revert; score falls toward 21–22.
Contained but violent — low-grade war	26%	An on-off campaign with a blockaded Iran, a trickle of escorted transits and a stalled Omani track; markets stay repriced (rates high) but oil rangebound \$80–95.	Brent \$80–95; MOVE 75–85; risk premium \$8–22/bbl; score 25–26 as political/oil upgrade.
Deal collapse — sustained standoff	22%	The MoU formally lapses at its midpoint; the strait stays shut, the blockade hardens, fighting persists. Iranian barrels stranded.	Brent \$92–108; oil to 3; 10Y >4.65%, 30Y >5.20% (Stage-4 B trips); score 27–28.
Return to full war	32%	The strike/blockade cycle becomes a sustained campaign; Iran keeps hitting Gulf bases/infrastructure. Ceasefire declared over; both escalating.	Brent \$105–140; MOVE >90; oil to 3–4, political to 5; score 28–30.
Regional relapse — Gulf energy infrastructure hit	6%	Iran hits Abqaiq/Ras Tanura/Fujairah or the bypass pipelines — removing the last cushion. It has already disabled UAE tankers and hit Jordan fuel depots.	Brent \$150+; emergency policy; HY spreads >500 bp; score 29–30.

Probability shifts from the 14 Jul edition: an Omani off-ramp is introduced at 14% (from the prior 10% mediated-pause), contained-but-violent +2 (24→26), deal collapse +2 (20→22), return to full war –8 (40→32), regional relapse held (6%). Driver: the emergence of a concrete Omani two-route proposal and “talks to continue” introduces a genuine, if narrow, de-escalation path and trims the full-war tail; but the reimposed blockade, the tanker attacks and the confirmed market repricing (two channel upgrades) keep the crisis-band scenarios dominant.

6 · Watchlist · next 24–72 hours

The Omani two-route proposal — the off-ramp. Whether Oman's drafted plan to manage the strait via two separately controlled routes is accepted and assures safe passage — the one path that reverses maritime/escalation and, with them, the score.

Oil →3 (\$95). Brent \$83.88 with a reimposed port blockade and a 9.4 mb/d supply deficit. The last major market channel yet to upgrade; \$11.1 away, closable if the blockade bites on flows.

Political →5 (\$4.75). AAA \$4.46 and DOE now turning up (\$3.855); the \$11 crude premium is still passing through. 29 cents to the threshold.

Stage-4 Threshold B (eased). 10Y 4.584% (7 bp below 4.65%), 30Y 5.100% (10 bp below 5.20%). The panic cooled, but a renewed risk-off or a weak long-bond auction re-arms it.

US-inflation →5 (5Y5Y >2.30%). Now at 2.21%; a further leg in oil that pushes forward inflation toward 2.30% would take the channel to 5.

Gulf energy infrastructure — the tail. Iran has disabled UAE tankers and hit Jordan fuel depots; Abqaiq/Ras Tanura/Fujairah or the bypass pipelines remain the scenario that removes the last oil cushion.

7 · Source log · this edition

Tier 1 — primary market data. Bloomberg Terminal extract (US_Iran_BBG_Data.xlsx, restated front-month continuation series). Tickers: CO2/CL2 Comdty (Brent/WTI front-month); NGA/TZTA/JGLA Comdty (Asia LNG pulled fresh); USGG2YR/5YR/10YR/20YR/30YR Index; USYC2Y10; USGGBE10; USGG5Y5Y; SOFRRATE; MOVE; VIX; DXY; AUTMUSAG (AAA pump — score reference) and USRFRUSA (DOE regular spot, weekly — corroboration, ticked up to \$3.855).

Tier 1 — news and institutional. CNN, CNBC, NBC News, Reuters, Bloomberg, Wikipedia, MarineTraffic, Kpler, the IEA, Wells Fargo Investment Institute; US CENTCOM, the IMO, NATO, Federal Reserve. The reimposed port blockade, the two disabled UAE tankers, Iran's strikes on five Gulf states, and — critically — Oman's drafted two-route strait proposal and "talks to continue" via CNN / Reuters / CNBC.

Tier 3 — state media (labelled). Iranian statements (the IRGC's "rogue supertankers" / "mined route" claims, the closure declaration, the FM's condemnation of US strikes, Ghalibaf's "all-out defense") are labelled and corroborated against CNN / Reuters / CENTCOM; IRNA, Tasnim, Mehr, Press TV, Xinhua, TASS used only with explicit role labels and never as sole sourcing for a market-moving claim.

8 · On-demand update protocol

#	Step	Detail
1	Refresh the Bloomberg extract	Parse the latest dated row as intraday; reclassify the prior session as a final close (14 Jul); re-map columns via the robust scan (oil front-month CO2/CL2; both gasoline series; Asia LNG pulled fresh).
2	Recompute deltas	d/d vs prior close; w/w vs the close five trading sessions back (w/w base = 8 Jul this edition); vs-pre-war vs the 27 Feb 2026 anchor.
3	Re-evaluate the six shock-score channels	Market channels move on a confirmed close — US-inflation UPGRADED 3→4 on the second consecutive 5Y5Y close >2.20% (sustained break confirmed). Treasury stays 5 (both legs held). Oil held 2 (<\$95). Maritime/escalation event-based, both maxed at 5.
4	Reconcile against the prior edition	Flag intraday-vs-close divergences (this edition: the 14 Jul close was near my intraday on oil, and bond vol cooled from Monday's spike — sparing Stage-4 Threshold B).
5	Update scenarios and watchlist	Re-rank near-term catalysts; lead with the Omani two-route off-ramp, oil →3 (\$95), political →5 (\$4.75) and Stage-4 Threshold B.

9 · Methodology

Shock-score scale. Six transmission channels (maritime denial, oil price shock, US inflation impulse, Treasury stress, political stress, escalation risk), each 0–5, summed to 0–30. Bands: 0–7 watch · 8–14 stress · 15–21 systemic-risk watch · 22–30 crisis. Market/economic channels move only on a confirmed close through a trigger; escalation-risk is event-based. This edition: **US-inflation upgraded 3→4** on the second consecutive 5Y5Y close above 2.20% (the trigger's "sustained" condition, met after a single 0.6 bp close was insufficient on 14 Jul). Treasury stays at 5. Maritime and escalation remain at their 5/5 maximum. Oil (→3 at \$95) and political (→5 at \$4.75) are the market channels still short of trigger.

Gasoline series. Political-stress is scored on AUTMUSAG (AAA all-grades retail pump; pre-war \$3.52, peak \$5.18, latest \$4.46) for continuity. USRFRUSA (DOE regular-grade retail spot; pre-war ~\$2.94, peak \$4.50, latest \$3.855 — up from \$3.777) is tracked alongside and has now turned up. See the chart in section 1.

Pre-war anchor (27 Feb 2026 close). Brent \$72.48; WTI \$67.02; 2Y 3.375%; 5Y 3.502%; 10Y 3.938%; 30Y 4.611%; 2s10s +55.64 bp; 5Y5Y 2.142%; 10Y BE 2.257%; MOVE 73.38; VIX 19.86; DXY 97.608; gasoline (AAA) \$3.52; Henry Hub \$3.06; TTF €31.23; Asia LNG ¥1,669. (Re-verified — unchanged.) Brent +15.7%, WTI +18.1%, TTF +72.6%, Asia LNG +60.9%; the 30Y (+49 bp), 5Y5Y (+7 bp), MOVE (+1.7, above pre-war) all sit above; the 10Y BE is at pre-war; only VIX (16.50) and US Henry Hub remain below.

Intraday caveat. The latest dated row is a Singapore-AM intraday snapshot; US-hours trading and headlines set the close. Market-channel triggers are evaluated on confirmed closes; escalation-risk is event-based. Absolute levels use the restated continuation series and are not directly comparable with pre-restatement editions, though the directional analysis is continuous.
