

HEADLINE JUDGMENT

Note: 16 Jul figures are intraday prints; 15 Jul is now a final close (\$83.47 Brent). Bloomberg's restated continuation series (front-month CO2/CL2) in force; JGLA / Asia LNG restated notably higher and pulled fresh. **Score HOLDS at 25/30 — but the internal picture has turned: the market has begun to de-escalate ahead of the still-maxed event channels.** The acute panic that fired Treasury (Mon) and US-inflation (Tue) has substantially reversed on the 15 Jul close: **MOVE fell back below 75 to 68.48** (from 77.77 Mon), **5Y5Y slipped back below the 2.20% line to 2.185%**, VIX eased to 15.67, and the 10Y is back to 4.56% (7 bp below its 4.65% trigger). Driving it is an intensive diplomatic push: Iran's FM Araghchi held two-route strait talks in Muscat, Qatar/Pakistan are mediating, France/Britain are studying Oman's IMO-backed navigation-fee proposal, and Iranian officials privately told US advisers the ship attacks were an "errant" hardliner act and that they "want to keep talking." **On our no-whipsaw discipline both upgrades HOLD on hysteresis:** Treasury stays 5 (the 30Y is still above 5.00% at 5.09%, even as the MOVE vol leg cooled); US-inflation stays 4 (5Y5Y at 2.187% is still above the 2.142% pre-war anchor, just not the 2.20% line). Escalation and maritime stay maxed at 5 — the US reinstated the port blockade (14 Jul), the ceasefire is "over," and the strait is still closed (no large vessel has run the Omani southern lane since 7 Jul). Oil holds 2 (Brent \$83.90, +\$11.4, still \$11 short of the \$95 trigger). Political 4 (AAA \$4.50, 25c from \$4.75). **The next moves now point DOWN if the Omani off-ramp delivers** (Treasury→4, US-inflation→3, escalation→4) — or a fresh re-escalation re-arms the climb. Sequencing 24 → 25 → 25.

1 · Live tape

Oil and natural gas — Bloomberg front-month / active

16 Jul 2026 readings are intraday prints; 15 Jul and earlier are final closes (restated continuation series; front-month CO2/CL2). d/d deltas are 16 Jul intraday vs 15 Jul close; w/w deltas are vs 9 Jul close.

Benchmark	Intraday 16 Jul	Δ d/d	Δ vs pre-war close (27 Feb)	BBG ticker
Brent front-month	\$83.90 /bbl	+\$0.43 (+\$7.70 w/w)	from \$72.48 (+15.8%) — ~\$11.4/bbl premium; the \$95 oil→3 trigger is \$11.1 away	CO2 Comdty
Brent · 15 Jul close (carried)	\$83.47 /bbl (−\$0.41 vs my intraday)	held ~\$83–84 as the market steadied on de-escalation hopes		CO2 Comdty (Close)
WTI front-month	\$79.59 /bbl	+\$0.47 (+\$7.69 w/w)	from \$67.02 (+18.8%) — near \$80	CL2 Comdty
Brent–WTI spread	\$4.31 /bbl	−\$0.04 d/d	wide	derived
Henry Hub natural gas	\$2.90 /MMBtu	−\$0.02 (−\$0.11 w/w)	from \$3.06 (−5.2%) — US gas BELOW pre-war (domestic); not Hormuz-exposed	NGA Comdty
TTF Dutch gas (active)	€54.85 /MWh	+€0.50 (+€4.75 w/w)	from €31.23 (+75.6%) — still climbing; 20% of global LNG transits the strait	TZTA Comdty
Japan/Asia LNG (15 Jul close)	¥3,168	+¥127 d/d	from ¥1,669 (+89.8%) — restated sharply higher; the most-stressed energy gauge, Qatari LNG strait-locked	JGLA Comdty
Strait · southern lane empty	Lloyd's List: no large vessel has transited the Omani southern lane (transponders on) since 7 Jul; the only alternative is Iran's northern lane, which needs "direct coordination" with its military.			Lloyd's List / CBS
IEA · supply 9.4 mb/d below pre-war	The "glut shield" is thinner than assumed; ADNOC cut its Aug Murban OSP to \$80.01 (from \$101.48). ~6,000 seafarers remain stranded on vessels in the Gulf.			IEA / UN

US Treasuries and inflation expectations — Bloomberg

16 Jul 2026 yields are intraday. d/d deltas are 16 Jul intraday vs 15 Jul close; w/w deltas are vs 9 Jul close. **The 15 Jul close reversed Monday's panic — bond vol and forward inflation both fell back below their triggers** — though the 30Y stays above 5.00%.

Tenor	Yield (%) — intraday 16 Jul	Δ d/d (bp)	Δ w/w (bp)	Δ vs pre-war (bp)	BBG ticker
2-year UST	4.15	+1.7	−2.5	+78 (from 3.37%) — eased as the panic reversed	USGG2YR Index
5-year UST	4.27	+1.3	−0.8	+77 (from 3.50%)	USGG5YR Index
10-year UST	4.56	+1.4	+1.0	+62 (from 3.94%) — back to 9 bp below the 4.65% trigger	USGG10YR Index
30-year UST	5.09	+1.1	+2.6	+48 (from 4.61%) — holds above 5.00% (Treasury stays 5)	USGG30YR Index
2s10s spread	+41 bp	−0.3	+3.7	−15 (re-steepened)	USYC2Y10 Index
10Y breakeven inflation	2.24	+0.2	−1.0	−2 (from 2.257%) — back below pre-war	USGGBE10 Index
5Y5Y forward inflation	2.19	+0.1	+1.2	+4 (from 2.14%) — slipped back below the 2.20% line (2.185% close); US-inflation on watch	USGG5Y5Y Index
SOFR (lagged print)	3.63	—	—	series lags	SOFRRATE Index

Cross-asset stress and political-transmission gauges — Bloomberg

Indicator	Latest	As of	Δ vs pre-war	Interpretation
DXY (dollar index)	100.47	16 Jul intraday	+2.86 (from 97.61)	Eased toward 100.5 — no haven bid; the dollar is not the stress valve.
MOVE Index (bond vol)	68.48	15 Jul (lagged)	−4.90 (from 73.38)	Fell back BELOW 75 (from Monday's 77.77 spike) and below pre-war — the Treasury→5 vol leg no longer holds; the channel stays 5 only on the 30Y (>5.00%). The clearest sign of market de-escalation.
VIX (equity vol)	15.67	15 Jul (lagged)	−4.19 (from 19.86)	Eased back toward its war low — equities are pricing the diplomatic track, not a wider war.
Gasoline · AUTMUSAG (AAA, all-grades pump) — score reference	\$4.50 /gal	14 Jul (latest)	+\$0.98 (from \$3.52, +28%)	The political-stress reference (pre-war \$3.52, peak \$5.18). Up from \$4.46 — the \$11 crude premium is feeding the pump. 25 cents below the \$4.75 threshold.
Gasoline · USRFRUSA (DOE, regular-grade spot) — corroboration	\$3.855 /gal	13 Jul (weekly)	~+\$0.92 (from ~\$2.94, +31%)	Regular-grade spot; ticked up from \$3.777 — confirms the pump is turning up with the crude bid.

US retail gasoline — the two tracked series, 2026 year-to-date

AUTMUSAG (AAA all-grades retail pump, daily) is the political-stress score reference (pre-war \$3.52, peak \$5.18, latest \$4.50); USRFRUSA (DOE regular-grade retail spot, weekly) is the complementary gauge (pre-war ~\$2.94, peak \$4.50, latest \$3.855). Both lines have turned decisively up off their early-July lows as the \$11/bbl crude premium feeds through with the usual refining/retail lag — AAA has risen for five of the last six sessions and is 25 cents from the \$4.75 political→5 threshold. This is the one channel where the shock is still building, not easing.

Strait operational state

Indicator	Current reading	Source
Diplomacy intensifies — the pivot	Araghchi held strait-focused talks in Muscat (two separately controlled routes; long-term management) and spoke with Oman, Turkey and Pakistan; Qatari mediators ran "positive" de-escalation talks in Tehran. France/Britain are studying Oman's IMO-backed navigation-fee proposal.	CBS / MS NOW / Reuters
Iran signals regret privately	Senior US officials say Iran privately conceded the ship attacks were an "errant" act by a hardliner faction and that it "wants to keep talking"; the White House wants a public acknowledgement. Talks led by Vance/Kushner/Witkoff/Rubio.	CBS
...but the surface stays hard	The US reinstated the naval blockade of Iranian ports (14 Jul); Trump calls the ceasefire "over"; new Supreme Leader Mojtaba Khamenei threatened "vengeance." The Muscat readout showed "little decided."	CENTCOM / Reuters / Wikipedia
Strait still closed	Lloyd's List: no large vessel has run the Omani southern lane (transponders on) since 7 Jul; ~6,000 seafarers stranded on hundreds of vessels. CENTCOM still calls the strait "open"; Iran says passage needs its coordination.	Lloyd's List / UN / CENTCOM
Markets price the off-ramp	MOVE 68.48 (<75), VIX 15.67, 5Y5Y back below 2.20%, Brent steady ~\$84 — the market has de-escalated ahead of the event channels, betting the Muscat/Qatar track holds.	Bloomberg
Wells Fargo view	"Until something changes with the status of the Strait, the bias remains for higher oil prices and, in turn, higher expected inflation and interest rates, and episodes of equity price volatility."	Wells Fargo II

2 · US economic shock — analysis with bond yields

The US economic shock holds at **25/30**, but for the first time in the re-escalation the momentum has turned: the market channels are easing even as the geopolitical channels stay maxed. Monday's bond-vol spike and inflation break — the two market upgrades — have both partly reversed (MOVE back below 75, 5Y5Y back below 2.20%). We hold Treasury at 5 and US-inflation at 4 on hysteresis (the 30Y is still above 5.00%; 5Y5Y is still above the pre-war anchor), avoiding a whipsaw, but both are now on watch for a downgrade. The driver is diplomacy: an intensive Oman/Qatar/Pakistan mediation and a private Iranian signal that the attacks were "errant."

2.1 · Bond-yield transmission

16 Jul yields are intraday; d/d vs 15 Jul close, w/w vs 9 Jul. **No channel moved; score held at 25.** The 15 Jul close reversed Monday's stress — MOVE 77.77 → 68.48, VIX 17.16 → 15.67, 5Y5Y 2.209% → 2.185%, the 10Y back to 4.56% — while the 30Y held above 5.00% and Brent held ~\$84. A textbook de-escalation on the rates side.

(i) Treasury — held at 5 on hysteresis; the vol leg cooled. The →5 upgrade required the 30Y above 5.00% WITH MOVE above 75. MOVE has since fallen to 68.48 (below 75 and below pre-war), so that condition no longer fully holds — but the downgrade trigger requires the 30Y to close back below 5.00% AND MOVE below 75, and the 30Y is still 5.09%. We therefore hold at 5 but flag it: a 30Y close below 5.00% reverts the channel to 4. The bond-vol breakout has, for now, unwound.

(ii) Inflation anchor — held at 4 on hysteresis; slipped below 2.20%. 5Y5Y closed at 2.185% (15 Jul), back below the 2.20% upgrade line after two closes above it, with the 16 Jul intraday 2.187%. It remains +4.5 bp above the 2.142% pre-war anchor, so the downgrade trigger (a sustained move back to the anchor) is not met; we hold at 4 but on watch. The week's inflation-repricing has half-reversed — the market is again unsure whether the shock is inflationary or growth-negative.

(iii) Oil — \$83.90; held at 2. Closes 14 Jul \$83.32, 15 Jul \$83.47; 16 Jul intraday \$83.90 (+\$11.4 premium, +15.8% vs pre-war); WTI \$79.59. Despite the reinstated blockade and an empty southern lane, Brent is rangebound ~\$83–84, \$11 below the \$95 oil→3 trigger — the spare-capacity/bypass cushion is holding, and the market is pricing the diplomatic off-ramp.

2.2 · What would push the shock to Stage 4

Stage 4 is a credit/auction event. Threshold B, which came within 3 bp on Monday, has eased with the panic.

Threshold A · 13 May 30Y auction. Historical. Cleared at 5.050%. With the 30Y at 5.09%, the next long-bond auction is still a demand test at these levels.

Threshold B · 30Y above 5.20% with 10Y above 4.65%. Eased. 30Y 5.091% is 11 bp below 5.20%; 10Y 4.561% is back 9 bp below 4.65% (from 3 bp Monday). The de-escalation bought room.

Threshold C · MOVE above 130. Receding. MOVE 68.48 fell back below pre-war; VIX 15.67. The bond-vol breakout has unwound — far below Stage-4 levels.

2.3 · Cross-asset

This is the first edition of the re-escalation where the market is leading the score lower rather than higher. The rates complex — which broke on Monday as the closure bit — has re-anchored on the Muscat/Qatar diplomacy: bond vol, forward inflation, equity vol and the dollar have all eased, and only the 30Y (still above 5.00%) and oil (still elevated but rangebound) keep the market channels at their upgraded levels. The score's 25 now rests on two maxed geopolitical channels (a closed strait, a reinstated blockade, a "dead" ceasefire) plus two market channels held on hysteresis. That configuration is inherently unstable: if the Omani two-route proposal delivers safe passage, the score unwinds quickly (escalation, Treasury and US-inflation all revert); if talks collapse and strikes resume, the market re-prices back through the triggers. The single most important variable is no longer a market level but the Muscat negotiating table. Note the divergence within energy: US Henry Hub sits below pre-war while Asia LNG is +90% — the shock is a Hormuz/LNG-routing event, not a global-energy event.

3 · Shock score

Total: **25/30** — **CRISIS band**. Band thresholds: 0–7 watch · 8–14 stress · 15–21 systemic-risk watch · 22–30 crisis.

Channel	Score	Rationale	Triggers
Maritime denial	5/5	Held at 5 (max) . No large vessel has run the Omani southern lane since 7 Jul (Lloyd's List); the US reinstated the port blockade (14 Jul); ~6,000 seafarers stranded. The strait remains effectively closed despite the Muscat talks.	↑ at max. ↓ Omani two-route deal delivers verified safe passage / traffic >25% of normal for 10 sessions → to 3–4.
Oil price shock	2/5	Held at 2 . Brent \$83.90 (+\$11.4, +15.8% vs pre-war); WTI \$79.59. Rangebound ~\$83–84, \$11.1 below the \$95 trigger — spare capacity and bypass pipelines still cushion the blockade/closure.	↑ Brent >\$95 sustained → to 3. ↓ mediated pause + close back at/below the \$72.48 anchor → to 1.
US inflation impulse	4/5	Held at 4 on hysteresis — ON WATCH . 5Y5Y slipped back below the 2.20% line (2.185% close; 2.187% intraday) after two closes above, but is still +4.5 bp above the 2.142% anchor. A sustained move to the anchor reverts to 3.	↑ 5Y5Y sustained >2.30% → to 5. ↓ 5Y5Y sustained at/below the 2.142% pre-war anchor → to 3.
Treasury stress	5/5	Held at 5 on hysteresis — vol leg cooled . The 30Y holds above 5.00% (5.091%), but MOVE fell to 68.48 (below the 75 leg and below pre-war). The bond-vol breakout has unwound; a 30Y close <5.00% reverts to 4.	↑ at max. ↓ 30Y close <5.00% with MOVE <75 sustained → back to 4.
Political stress	4/5	Held at 4 — the one channel still building . AAA pump \$4.50 (14 Jul), up from \$4.46 and rising five of the last six sessions as the crude premium feeds through; DOE spot \$3.855. 25 cents below the \$4.75 threshold.	↑ gasoline >\$4.75 sustained → to 5. ↓ toward the \$3.52 pre-war level → to 3.
Escalation risk	5/5	Held at 5 (max) — but de-escalation developing . The US reinstated the blockade and the ceasefire is “over,” but the acute strike cycle has eased and an intensive Oman/Qatar/Pakistan mediation is underway, with Iran privately signaling the attacks were “errant.”	↑ at max. ↓ mediated stand-down holds + talks resume → to 4–3.
TOTAL	25/30	CRISIS band — held at 25, but momentum has turned . Two market upgrades (Treasury, US-inflation) held only on hysteresis as the panic reversed; escalation is maxed but a diplomatic off-ramp is live. The next moves point down if Muscat delivers — or the climb resumes if talks collapse.	

4 · What's changed since the last edition (15 Jul → 16 Jul AM)

Score holds at 25/30 — but the market has begun to de-escalate. Both recent upgrades are now held only on hysteresis. Source: Bloomberg / CBS / Reuters.

The panic reversed. On the 15 Jul close MOVE fell 77.77 → 68.48 (below 75), 5Y5Y slipped back below 2.20% (2.185%), VIX eased to 15.67, the 10Y to 4.56%. Stage-4 Threshold B eased back to 9 bp away. Source: Bloomberg.

Diplomacy is the pivot. Araghchi held two-route strait talks in Muscat; Qatar/Pakistan are mediating; France/Britain study Oman's IMO-backed fee proposal; Iran privately called the ship attacks “errant” and wants to keep talking. Source: CBS / MS NOW.

But the surface stayed hard. The US reinstated the port blockade (14 Jul), Trump calls the ceasefire “over,” the strait is still closed (no southern-lane transit since 7 Jul), and the Muscat readout showed “little decided.” Escalation/maritime stay 5. Source: CENTCOM / Lloyd's List.

Gasoline still building. AAA rose to \$4.50 (from \$4.46); DOE \$3.855. Political stays 4, 25 cents from →5 — the one channel where the shock is still intensifying. Source: AAA / DOE.

Asia LNG restated higher. JGLA revised up to ¥3,168 (+89.8% vs pre-war) — the most-stressed energy gauge, reflecting strait-locked Qatari LNG. Source: Bloomberg (JGLA).

5 · Scenario map · next 7 to 30 days

Scenario	P	Description	Market path
Omani off-ramp — two-route deal, de-escalation	20%	The Muscat two-route proposal (IMO-backed) delivers verified safe passage; strikes halt, the blockade lifts, talks resume. The market is already leaning this way.	Brent \$70–82; MOVE <70; Treasury→4, US-inflation→3, escalation→4; score falls toward 20–22.
Contained but violent — low-grade war	28%	An on-off campaign with a blockaded Iran, a trickle of coordinated transits and a stalled Muscat track; rates re-anchored but oil rangebound \$80–92.	Brent \$80–92; MOVE 68–80; risk premium \$8–18/bbl; score 24–25; political→5 as gasoline climbs.
Deal collapse — sustained standoff	22%	The MoU formally lapses at its midpoint; the strait stays shut, the blockade hardens, fighting persists at low intensity. Iranian barrels stranded.	Brent \$90–106; oil to 3; 10Y >4.65%, 30Y >5.20% (Stage-4 B trips); score 26–27.
Return to full war	24%	Muscat collapses and the strike/blockade cycle resumes as a sustained campaign; Iran hits Gulf bases/infrastructure. Trimmed as the diplomatic track gains.	Brent \$105–140; MOVE >90; oil to 3–4, political to 5, US-inflation back to 4–5; score 28–30.
Regional relapse — Gulf energy infrastructure hit	6%	Iran hits Abqaiq/Ras Tanura/Fujairah or the bypass pipelines — removing the last cushion. Precedent set (UAE tankers, Jordan fuel depots).	Brent \$150+; emergency policy; HY spreads >500 bp; score 29–30.

Probability shifts from the 15 Jul edition: the Omani off-ramp rises to 20% (from 14%), contained-but-violent +2 (26→28), deal collapse held (22%), return to full war –8 (32→24), regional relapse held (6%). Driver: the market's clear de-escalation (bond vol and forward inflation back below trigger), the intensive Oman/Qatar/Pakistan mediation and Iran's private “errant” signal shift weight toward the off-ramp and away from

full war — while the reinstated blockade and the “dead” ceasefire keep the crisis-band scenarios collectively dominant. The Muscat table, not a market level, is now the swing variable.

6 · Watchlist · next 24–72 hours

The Muscat two-route proposal — the swing. Whether Oman's IMO-backed plan (two separately controlled routes, possible navigation fees) delivers a verified safe-passage pledge. Success reverts escalation/maritime and, with them, the score; collapse re-arms the climb.

Treasury →4 (on watch). The 30Y (5.091%) is the last leg holding the channel at 5; a confirmed 30Y close below 5.00% with MOVE below 75 reverts it to 4. MOVE has already cooled to 68.48.

US-inflation →3 (on watch). 5Y5Y (2.187%) slipped below the 2.20% line; a sustained move toward the 2.142% pre-war anchor reverts the channel to 3.

Political →5 (\$4.75) — the one still building. AAA \$4.50 and rising as the crude premium feeds through; 25 cents to the threshold. The lone upside-pressure channel.

Oil →3 (\$95). Brent \$83.90, rangebound; a blockade-driven physical squeeze that breaks \$95 takes oil 2→3. A mediated reopening reverses it toward pre-war.

Blockade / strikes. Whether the reinstated US port blockade tightens or is lifted as a bargaining chip, and whether the strike pause holds — the fastest signals on which way the event channels break.

7 · Source log · this edition

Tier 1 — primary market data. Bloomberg Terminal extract (US_Iran_BBG_Data.xlsx, restated front-month continuation series). Tickers: CO2/CL2 Comdty (Brent/WTI front-month); NGA/TZTA/JGLA Comdty (Asia LNG restated higher, pulled fresh); USGG2YR/5YR/10YR/20YR/30YR Index; USYC2Y10; USGGBE10; USGG5Y5Y; SOFRRATE; MOVE; VIX; DXY; AUTMUSAG (AAA pump — score reference) and USRFRUSA (DOE regular spot, weekly — corroboration).

Tier 1 — news and institutional. CBS News, MS NOW, Reuters, Bloomberg, CNBC, Lloyd's List, Wikipedia, the IEA, the UN (IMO, Secretary-General), Wells Fargo Investment Institute; US CENTCOM, Federal Reserve. The Muscat two-route talks, the Qatar/Pakistan mediation, Iran's private “errant” signal, the reinstated US port blockade and the empty southern lane via CBS / MS NOW / Reuters / Lloyd's List.

Tier 3 — state media (labelled). Iranian statements (the FM's condemnation of US strikes, the “errant faction” framing, the new Supreme Leader's “vengeance” message, routing/toll claims) are labelled and corroborated against CBS / Reuters / CENTCOM; IRNA, Tasnim, Mehr, Press TV, Xinhua, TASS used only with explicit role labels and never as sole sourcing for a market-moving claim.

8 · On-demand update protocol

#	Step	Detail
1	Refresh the Bloomberg extract	Parse the latest dated row as intraday; reclassify the prior session as a final close (15 Jul); re-map columns via the robust scan (oil front-month CO2/CL2; both gasoline series; Asia LNG pulled fresh — restated higher this edition).
2	Recompute deltas	d/d vs prior close; w/w vs the close five trading sessions back (w/w base = 9 Jul this edition); vs-pre-war vs the 27 Feb 2026 anchor.
3	Re-evaluate the six shock-score channels	Market channels move on a confirmed close — Treasury and US-inflation HELD on hysteresis as the panic reversed (MOVE back <75; 5Y5Y back <2.20% but still >the 2.142% anchor); neither downgrade trigger met, so no whipsaw. Oil held 2. Maritime/escalation event-based, both maxed at 5 (de-escalation developing but blockade reinstated).
4	Reconcile against the prior edition	Flag intraday-vs-close divergences (this edition: the 15 Jul close reversed my intraday — 5Y5Y and MOVE fell back below their triggers; Asia LNG restated sharply higher).
5	Update scenarios and watchlist	Re-rank near-term catalysts; lead with the Muscat two-route proposal, the Treasury→4 / US-inflation→3 hysteresis downgrades, political→5 (\$4.75) and oil→3 (\$95).

9 · Methodology

Shock-score scale. Six transmission channels (maritime denial, oil price shock, US inflation impulse, Treasury stress, political stress, escalation risk), each 0–5, summed to 0–30. Bands: 0–7 watch · 8–14 stress · 15–21 systemic-risk watch · 22–30 crisis. Market/economic channels move only on a confirmed close through a trigger; escalation-risk is event-based. **Hysteresis note:** this edition Treasury and US-inflation held at their upgraded levels despite the triggering conditions easing (MOVE back below 75; 5Y5Y back below 2.20%), because the published downgrade triggers (30Y close <5.00%; 5Y5Y sustained at/below the 2.142% anchor) were not met. This asymmetry — upgrade on a sustained break, downgrade only on a sustained reversal past a wider threshold — is deliberate, to avoid whipsawing on single sessions.

Gasoline series. Political-stress is scored on AUTMUSAG (AAA all-grades retail pump; pre-war \$3.52, peak \$5.18, latest \$4.50) for continuity. USRFRUSA (DOE regular-grade retail spot; pre-war ~\$2.94, peak \$4.50, latest \$3.855) is tracked alongside and has turned up. See the chart in section 1.

Pre-war anchor (27 Feb 2026 close). Brent \$72.48; WTI \$67.02; 2Y 3.375%; 5Y 3.502%; 10Y 3.938%; 30Y 4.611%; 2s10s +55.64 bp; 5Y5Y 2.142%; 10Y BE 2.257%; MOVE 73.38; VIX 19.86; DXY 97.608; gasoline (AAA) \$3.52; Henry Hub \$3.06; TTF €31.23; Asia LNG ¥1,669. (Re-verified — unchanged.) Brent +15.8%, WTI +18.8%, TTF +75.6%, Asia LNG +89.8%; the 30Y (+48 bp) and 5Y5Y (+4 bp) sit above; MOVE (68.48), 10Y BE, VIX and US Henry Hub are now back at/below pre-war — the market's stress gauges have re-anchored while the geopolitical channels stay maxed.

Intraday caveat. The latest dated row is a Singapore-AM intraday snapshot; US-hours trading and headlines set the close (this edition the 15 Jul close reversed Monday's spike — MOVE and 5Y5Y fell back below their triggers). Market-channel triggers are evaluated on confirmed closes; escalation-risk is event-based. Absolute levels use the restated continuation series and are not directly comparable with pre-restatement editions, though the directional analysis is continuous.
