

HEADLINE JUDGMENT

Note: 22 Jul figures are intraday prints; 21 Jul is now a final close (\$88.52 Brent). Restated continuation series (front-month CO2/CL2) in force. Score HOLDS at 25/30 — all six channels unchanged, a sixth session at 25 — but the re-pricing that began on 20 Jul extended through a second consecutive US session, and Stage-4 Threshold B is now within 2.2 bp on one leg — the closest approach of the war. The 21 Jul close: Brent \$88.52 (highest since 11 Jun, +\$1.91 above my intraday), 10Y 4.628% (highest since 19 May; 2.2 bp below the 4.65% Stage-4 leg), 30Y 5.131% (highest since 19 May), TTF €59.66 (highest since 19 Mar; intraday €60.39, the first €60-handle since March), Asia LNG FRESH at ¥3,406 (+104% — first double vs pre-war), MOVE 74.67 — above pre-war for the first time since 14 Jul. Gasoline closed its data gap at the threshold's edge: the 20 Jul AAA print landed at \$4.65 — a fifth consecutive rise, 10 cents from the political→5 trigger — and the DOE weekly printed \$4.001. The news is two-handed for the first time in weeks: a tenth consecutive day of US strikes and a Houthis blockade declared on Saudi ports — aimed at the bypass architecture that has kept oil at 2/5 — but also the first live mediation vehicle since Oman was compromised: Qatar, Egypt, Pakistan and Oman have tabled a 10-day ceasefire with dual-lane reopening and Malacca-style transit fees; Washington is exploring it while Trump may strike for several more days first. No trigger fired on a confirmed close, so no channel moved. Both event channels remain maxed at 5 — the hold is an artifact of the scale, not evidence of stability. Sequencing 25 → 25 → 25.

Oil and natural gas — Bloomberg front-month / active

22 Jul 2026 readings are intraday prints; 21 Jul and earlier are final closes (restated continuation series; front-month CO2/CL2). d/d deltas are 22 Jul intraday vs 21 Jul close; w/w deltas are vs 15 Jul close.

Benchmark	Intraday 22 Jul	Δ d/d	Δ vs pre-war close (27 Feb)	BBG ticker
Brent front-month	\$89.58 /bbl (H 89.75 / L 88.66)	+\$1.06 (+\$6.11 w/w)	from \$72.48 (+23.6%) — ~\$17.1/bbl premium; intraday high \$5.25 below the \$95 oil→3 trigger; active COA prints \$91.50	CO2 Comdty (Close)
Brent · 21 Jul close (final)	\$88.52 /bbl (+\$1.91 vs my 21 Jul intraday \$86.61)	highest close since 11 Jun; second plateau-breaking close	\$6.48 below the \$95 trigger on a close basis; the range has shifted again, to \$86–90	
WTI front-month	\$82.89 /bbl	–\$1.45 (+\$3.77 w/w)	from \$67.02 (+23.7%) — the CL2 intraday print looks stale (active CLA \$84.69, +\$2.27); treated as a data artifact pending the close	CL2 Comdty
Brent–WTI spread	\$6.69 /bbl	inflated by the stale WTI print	~\$4.2 on the active contracts	derived
Henry Hub natural gas	\$2.90 /MMBtu	+\$0.04 (–\$0.02 w/w)	from \$3.06 (–5.3%) — US gas BELOW pre-war; not Hormuz-exposed	NGA Comdty
TTF Dutch gas (active)	€60.39 /MWh	+€0.73 (+€6.04 w/w)	from €31.23 (+93.4%) — 21 Jul close €59.66 highest since 19 Mar; first €60-handle intraday since March	TZTA Comdty
Japan/Asia LNG (21 Jul close — FRESH print)	¥3,406	+¥125 vs 17 Jul	from ¥1,669 (+104.1%) — first double vs pre-war; ¥24 below the war-era record (23 Mar)	JGLA Comdty
Strait · tenth day of strikes	US bombing entered a tenth consecutive day; IRGC claims strikes on US installations in Jordan, Kuwait and Bahrain (Tier 3, unconfirmed); Houthis declared a blockade of Saudi ports; mediators tabled a 10-day ceasefire with strait reopening — the first live vehicle since Oman collapsed.		Bloomberg / Axios / CNBC	
Insurance & traffic	Transits ~11% of normal (12 Jul count); ~340 anchored (tracker basis revised from ~475); 35 tankers AIS-dark in 24h; war-risk ~8× pre-crisis, VLCC ~\$2.5m; six P&I; clubs withdrawn; 8 of 9 carriers rerouting via the Cape.		straits.live / Windward	

US Treasuries and inflation expectations — Bloomberg

22 Jul 2026 yields are intraday. d/d deltas are vs the 21 Jul close; w/w vs 15 Jul. Both Stage-4 legs printed their highest closes since 19 May; the 10Y leg is within 2.2 bp of its threshold.

Tenor	Yield (%) — intraday 22 Jul	Δ d/d (bp)	Δ w/w (bp)	Δ vs pre-war (bp)	BBG ticker
2-year UST	4.26	–0.4	+12.3	+88 (from 3.37%)	USGG2YR Index
5-year UST	4.37	+0.0	+10.7	+87 (from 3.50%)	USGG5YR Index
10-year UST	4.63	+0.4	+8.5	+69 (from 3.94%) — 21 Jul close 4.628%, highest since 19 May; 2.2 bp below the 4.65% Stage-4 leg — the war's closest	USGG10YR Index

Tenor	Yield (%) — intraday 22 Jul	Δ d/d (bp)	Δ w/w (bp)	Δ vs pre-war (bp)	BBG ticker
30-year UST	5.14	+0.7	+5.9	+53 (from 4.61%) — 21 Jul close 5.131%, highest since 19 May; 13 bp above 5.00%; 6.9 bp below the 5.20% Stage-4 leg	USGG30YR Index
2s10s spread	+37 bp	+1.0	−3.8	−18 (flatter)	USYC2Y10 Index
10Y breakeven inflation	2.27 (21 Jul close; 22 Jul lagged)	—	+3.3	+1.3 (from 2.257%) — first close ABOVE the pre-war anchor since the mid-July dip	USGGBE10 Index
5Y5Y forward inflation	2.23	+0.7	+4.1	+8 (from 2.14%) — second close above the 2.20% line; intraday 2.226%, 7.4 bp below the 2.30% →5 trigger	USGG5Y5Y Index
SOFR (lagged print, 20 Jul)	3.57	—	—	series lags	SOFRRATE Index

Cross-asset stress and political-transmission gauges — Bloomberg

Gauge	Latest	As of	Δ vs pre-war	Interpretation
DXY	101.17	22 Jul intraday	+3.56 (from 97.61)	Rangebound ~101 — flat d/d; no haven bid; the dollar is still not the stress valve.
MOVE	74.67	21 Jul close (22 Jul lagged)	+1.29 (from 73.38)	ABOVE its pre-war close for the first time since 14 Jul, a third consecutive rise, 0.33 pt below the 75 line — bond vol is re-building with the long-end sell-off.
VIX	17.05	21 Jul close (22 Jul lagged)	−2.81 (from 19.86)	Eased from 18.65 even as the long end sold off — equities are treating this as a rates/energy story, not risk-off. The divergence is itself worth watching.
AAA gasoline	\$4.65 /gal	20 Jul print (latest; 21–22 Jul pending)	+\$1.13 (from \$3.52, +32%)	The political-stress reference (pre-war \$3.52, peak \$5.18). The 20 Jul print closed the data gap at \$4.65 — a fifth consecutive rise, 10 cents below the \$4.75 threshold.
DOE gasoline	\$4.001 /gal	20 Jul weekly print	~+\$1.06 (from ~\$2.94, +36%)	Back on a \$4-handle for the first time since 15 Jun — +14.6c on the week; the crude premium is feeding through to the pump.

US retail gasoline — the two tracked series, 2026 year-to-date

AUTMUSAG (AAA all-grades retail pump, daily) is the political-stress score reference (pre-war \$3.52, peak \$5.18, latest \$4.65 on 20 Jul); USRFRUSA (DOE regular-grade retail spot, weekly) is the complementary gauge (pre-war ~\$2.94, peak \$4.50, latest \$4.001 on 20 Jul). The AAA series has risen in five consecutive prints (\$4.46 → \$4.65) and sits 10 cents from the \$4.75 political→5 threshold; the 21–22 Jul prints are pending. At the recent 4–5c/session pace the next confirmed print could land at or through the trigger — the channel is evaluated on confirmed prints only, so the score holds until the data lands.

Strait operational state

Indicator	Current reading	Source
Strait closed · day ~144	Closed to commercial traffic since 12 Jul (blockade regime since 28 Feb war start); US naval blockade plus escort operation (~900 escorted transits, ~450m bbl since early May, per CENTCOM); Iran conditions transit on its own coordination and fees.	CENTCOM / maritime trackers
Tenth consecutive day of US strikes	CENTCOM strikes (20 Jul 9pm ET) targeted command centers, maritime-denial capabilities, missile/drone launch sites and air defenses — stated objective: degrade attacks on commercial shipping. IRGC claims retaliatory strikes on US installations in Jordan, Kuwait and Bahrain — Tier 3, unconfirmed by the US. US deaths reported at 17–18 total.	CENTCOM / Fox / Axios / IRGC (Tier 3)
Houthi blockade of Saudi ports declared	Yemen-based, Iran-backed Houthis declared a maritime blockade of Saudi ports — a new Red Sea vector aimed at the East–West pipeline outlet at Yanbu, i.e. at the bypass architecture that has capped the crude shock. A projectile struck a vessel near Dibba, UAE (21 Jul).	CNBC / Axios / straits.live
Mediation revived — 10-day ceasefire tabled	Qatar, Egypt, Pakistan and Oman presented a written framework (~20 Jul, building on 11 Jul Muscat talks): 10-day ceasefire, both Hormuz lanes reopened, Malacca-style ‘reasonable service fees’ for Iran via a possible IMO-linked fund, to revive the June interim agreement. Washington is exploring it while deploying more air power; Trump calls negotiation potentially a waste of time; Iran confirms receipt; no talks scheduled. FT reports a regime-change option re-emerging; Israel prepares a possible full-scale campaign.	Axios / Reuters via MEMO / Bloomberg / FT
Traffic and insurance	Transits ~11% of normal (10 vs 88/day, 12 Jul count); ~99 in transit, ~340 anchored (tracker basis revised from ~475); 35 tankers AIS-dark in 24h; war-risk ~8× pre-crisis, VLCC ~\$2.5m; six P&I; clubs withdrawn; 8 of 9 carriers rerouting via the Cape (\$600–1,200/TEU surcharges).	straits.live / Windward / CNBC

2 · US economic shock — analysis with bond yields

The US economic shock holds at 25/30, but the 20 Jul re-pricing has become a trend: the 21 Jul US session was the second consecutive close at multi-week or multi-month extremes across Brent, the 10Y, the 30Y and TTF, and it pulled Stage-4 Threshold B to within 2.2 bp on the 10Y leg — the closest approach of the war, tighter than the 13 Jul near-miss (2.6 bp). Nothing crossed a scoring trigger, so no channel moved — but the gap between the tape and the next tier of the score is now measured in basis points and dimes: oil is \$6.48 from its trigger on a close basis, gasoline 10 cents, forward inflation 8 bp, and the 10Y Stage-4 leg 2.2 bp.

2.1 · Bond-yield transmission

22 Jul yields are intraday; d/d vs 21 Jul close, w/w vs 15 Jul. No channel moved; score held at 25.

(i) Treasury — held at 5; the fundamentals-hold is compounding. The 30Y closed 21 Jul at 5.131% — a second consecutive highest-close-since-May — and prints 5.139% intraday. The cushion above the 5.00% downgrade leg has widened from 7 bp (17 Jul) to 11 bp (20 Jul) to 13 bp, and MOVE has risen for a third straight session to 74.67 — back above its pre-war close for the first time since 14 Jul and within 0.33 pt of the 75 line that forms the other half of the downgrade condition. The channel that was held at 5 by hysteresis alone ten days ago is now held by term premium, supply concession ahead of the next long-bond auction, and a re-building war risk premium.

(ii) Inflation anchor — held at 4; the dip is fully reversed. 5Y5Y closed 2.206% (20 Jul) and 2.219% (21 Jul) — two consecutive closes above the 2.20% line — and prints 2.226% intraday, the highest since early June. The 10Y breakeven closed 2.270%, its first close above the pre-war anchor since the mid-July dip. The 2.30% →5 trigger is 8.0 bp away on a close basis (7.4 intraday) and the gauge is rising ~1 bp/session; the downgrade (a sustained move to the 2.142% anchor) is 7.8 bp below spot and receding.

(iii) Oil — held at 2; the trigger is inside a normal week's range. The 21 Jul close \$88.52 is the highest since 11 Jun and the second consecutive close above the broken \$82–84 plateau; the intraday tape prints \$89.58 with a high of \$89.75, and the active COA contract prints \$91.50 — the continuation front-month is lagging the active board. The \$95 →3 trigger is \$6.48 above the confirmed close — less than the last week's \$6.11 advance. The bypass pipelines remain the cushion, which is precisely why the Houthi declaration of a blockade on Saudi ports matters: the East–West line's Red Sea outlet at Yanbu is the largest single component of that cushion. A credible strike there collapses the containment argument in one session. (The WTI CL2 intraday print, −\$1.45 d/d against Brent +\$1.06, looks stale vs the active CLA at \$84.69 and is treated as a data artifact pending the close.)

2.2 · What would push the shock to Stage 4

Stage 4 is a credit/auction event. Threshold B is at its closest approach of the war.

Threshold A · 13 May 30Y auction. Historical. Cleared at 5.050%. With the 30Y closing 5.131% and rising, the next long-bond auction prices well above the May clearing level — a live demand test.

Threshold B · 30Y above 5.20% with 10Y above 4.65%. Closest approach of the war. On the 21 Jul close the 10Y (4.628%) is 2.2 bp below its leg — tighter than the 13 Jul near-miss (2.6 bp) — and the 30Y (5.131%) is 6.9 bp below its leg (13 Jul: 9.5 bp). Intraday the gaps are 1.8 and 6.2 bp. One more session at the current pace of the long-end sell-off trips the 10Y leg; the 30Y leg is the binding constraint. Both legs must cross together for the threshold to fire.

Threshold C · MOVE above 130. Far — but no longer falling. MOVE 74.67 is above pre-war for the first time since 14 Jul and has risen three straight sessions; VIX (17.05) eased. The vol complex is waking up on the rates side first.

2.3 · Cross-asset

The re-pricing remains orderly — levels first, vol second, equities not at all. Brent, the 10Y, the 30Y and TTF have now re-marked for two consecutive sessions while VIX eased to 17.05; MOVE alone is following the levels higher. The dollar is flat at ~101 — no haven bid. The gas complex is still the most stressed corner and getting worse: TTF +93% vs pre-war with a €60-handle intraday, Asia LNG +104% at a fresh print (first double vs pre-war, ¥24 off the war-era record), while US Henry Hub sits 5% BELOW pre-war — the signature of a Hormuz/LNG-routing shock, not a global-energy shock. The new cross-asset risk is geographic: a Houthi campaign against Saudi Red Sea ports would hit the bypass pipelines — the one piece of physical architecture keeping oil at 2/5 — and would move crude, breakevens and bond vol together. The 20–21 Jul sessions showed that convexity at low amplitude; a Yanbu event would show it at full amplitude.

3 · Shock score

Total: 25/30 — CRISIS band. Band thresholds: 0–7 watch · 8–14 stress · 15–21 systemic-risk watch · 22–30 crisis.

Channel	Score	Rationale	Triggers
Maritime denial	5/5	Held at 5 (max). Strait closed to commercial traffic; transits ~11% of normal; ~340 ships anchored in the zone; 35 tankers AIS-dark; six P&I; clubs withdrawn; Houthis extend the denial regime to Saudi Red Sea ports. No verified reopening — though the mediators' framework is the first credible reopening vehicle since Oman collapsed.	↑ at max. ↓ verified reopening (escorted convoys) with traffic above 25% of normal for 10 sessions → to 3–4.
Oil price shock	2/5	Held at 2. The 21 Jul close \$88.52 — highest since 11 Jun, second consecutive plateau-breaking close; intraday \$89.58 (+23.6% vs pre-war, ~\$17.1 premium); active COA prints \$91.50. \$6.48 below the \$95 trigger on a close basis — inside a normal week's range.	↑ Brent above \$95 sustained → to 3. ↓ mediated pause + close back at/below the \$72.48 anchor → to 1.
US inflation impulse	4/5	Held at 4. 5Y5Y: two consecutive closes above the 2.20% line (2.206%, 2.219%), intraday 2.226%; 10Y BE closed above its pre-war anchor. Rising ~1 bp/session — 8.0 bp below the →5 trigger on a close basis.	↑ 5Y5Y sustained above 2.30% → to 5. ↓ 5Y5Y sustained at/below the 2.142% pre-war anchor → to 3.
Treasury stress	5/5	Held at 5 — fundamentals-held. 30Y closed 5.131% (highest since 19 May), 13 bp above the 5.00% leg; MOVE 74.67, above pre-war and 0.33 pt under the 75 line, rising three straight sessions. The downgrade condition is receding on both legs.	↑ at max. ↓ 30Y close under 5.00% with MOVE under 75 sustained → to 4.
Political stress	4/5	Held at 4 — one print from the trigger. AAA \$4.65 (20 Jul print, latest confirmed) — fifth consecutive rise, 10c below \$4.75; DOE weekly \$4.001, first \$4-handle since 15 Jun. The 21–22 Jul prints are pending; at the recent 4–5c pace the next print lands at the threshold. Evaluated on confirmed prints only.	↑ gasoline above \$4.75 sustained → to 5. ↓ toward the \$3.52 pre-war level → to 3.
Escalation risk	5/5	Held at 5 (max). Tenth consecutive day of US strikes; IRGC claims hits on US installations in three countries (Tier 3); Houthis declare a Saudi-ports blockade; FT reports regime-change options re-emerging; Israel prepares a possible full-scale campaign. The ceasefire proposal is live but unaccepted — Trump may strike for several more days first.	↑ at max. ↓ mediated stand-down + talks resume → to 4–3.
TOTAL	25/30	CRISIS band — sixth session at 25, and the gap between the tape and the next tier has collapsed to basis points and dimes: political →5 is 10c away on a pending print, oil →3 \$6.48, US-inflation →5 8 bp, Stage-4 B 2.2 bp on one leg. With both event channels maxed, only market channels can move the score — and all four are moving toward their triggers.	

4 · What's changed since the last edition (21 Jul → 22 Jul AM)

Score holds at 25/30 for a sixth session — the re-pricing extended and the diplomacy restarted on the same day. No channel moved; every market channel again ended closer to its upgrade trigger. Source: Bloomberg.

The 21 Jul close extended the break. Brent \$88.52 — +\$1.91 above my 21 Jul intraday (\$86.61) and the highest close since 11 Jun; 10Y 4.628% (highest since 19 May; 2.2 bp from the Stage-4 leg — the war's closest); 30Y 5.131% (highest since 19 May); TTF €59.66 (highest since 19 Mar); 5Y5Y 2.219% (second close above 2.20%); MOVE 74.67 (above pre-war for the first time since 14 Jul). Source: Bloomberg.

Mediation revived — a 10-day ceasefire is on the table. Qatar, Egypt, Pakistan and Oman tabled a written framework: 10-day truce, both Hormuz lanes reopened, Malacca-style transit fees for Iran via a possible IMO-linked joint fund, aimed at reviving the June interim agreement. Washington is exploring it; Trump is publicly skeptical and may continue strikes for several days; Iran confirms receipt and signals willingness. No talks scheduled. Source: Axios / Reuters via MEMO / Bloomberg.

Tenth consecutive day of US strikes. CENTCOM targeted command centers, maritime-denial capabilities and air defenses, framing the campaign as protecting commercial shipping; IRGC claims retaliatory hits on US installations in Jordan, Kuwait and Bahrain (Tier 3, unconfirmed). US deaths reported at 17–18. FT reports regime-change options re-emerging. Source: CENTCOM / Fox / Axios / FT.

Houthis declare a blockade of Saudi ports. A new Red Sea escalation vector aimed at the East–West pipeline outlet at Yanbu — the core of the bypass cushion under oil 2/5. A projectile struck a vessel near Dibba, UAE. Source: CNBC / Axios / straits.live.

The gasoline data gap resolved at the threshold's edge. The 20 Jul AAA print landed at \$4.65 (fifth straight rise, 10c from the political→5 trigger); the DOE weekly printed \$4.001, its first \$4-handle since 15 Jun. The 21–22 Jul AAA prints are pending. Source: AAA / DOE / Bloomberg.

5 · Scenario map · next 7 to 30 days

Scenario	P	Description	Market path
Return to full war	37%	Still the modal path: a tenth day of strikes, IRGC retaliation claims across three countries, a Houthi front opening against Saudi Arabia, regime-change talk re-emerging, and Trump publicly discounting the ceasefire while deploying additional air power.	Brent \$105–140; MOVE above 90; oil to 3–4, political to 5, US-inflation to 5; score 28–30.
Contained but violent — blockaded stalemate	24%	Strikes continue but stay off major energy infrastructure; escort-only transits; the bypass pipelines keep capping crude. The second week of re-pricing and the Houthi threat to the bypass both argue this equilibrium is eroding.	Brent \$86–94; MOVE 72–82; risk premium \$14–22/bbl; score 25–26 as political→5 lands.
Deal collapse — MoU formally lapses	20%	The ceasefire proposal is rejected or expires; sanctions harden; the strait stays shut; fighting persists at high intensity without full-war targeting. Failure of the new framework migrates probability here and to full war.	Brent \$90–106; oil to 3; 10Y above 4.65%, 30Y above 5.20% (Stage-4 B trips); score 26–27.
Regional relapse — Gulf energy infrastructure hit	9%	Iran or the Houthis extend the infrastructure template to Abqaiq/Ras Tanura/Fujairah, Yanbu or the bypass pipelines — removing the last cushion. The declared Saudi-ports blockade makes this the best-armed tail in the map.	Brent \$150+; emergency policy; HY spreads above 500 bp; score 29–30.
Mediated pause — the 10-day ceasefire sticks	10%	Washington and Tehran accept the Qatar/Egypt/Pakistan/Oman framework; strikes halt, both lanes reopen under the fee regime, and talks on reviving the interim deal resume. The first scenario upgrade for diplomacy since Oman was compromised.	Brent \$74–86; MOVE under 70; Treasury→4, US-inflation→3, escalation→4; score falls toward 20–22.

Probability shifts from the 21 Jul edition: mediated pause +3 (7→10) — the tabled framework is the first live venue with written terms and acknowledged receipt on both sides; return to full war –1 (38→37) — still modal, but a genuine diplomatic window now exists alongside the escalation; contained-but-violent –1 (25→24) and deal collapse –1 (21→20) — the new framework will resolve one way or the other, pulling probability out of the ambiguous middle; regional relapse holds at 9 — the Houthi Saudi-ports declaration re-arms the tail even as diplomacy opens. Driver: for the first time since 16 Jul the distribution is genuinely two-tailed — the same 48 hours produced the war's closest Stage-4 approach and its most concrete peace proposal.

6 · Watchlist · next 24–72 hours

Political →5 (\$4.75) — one print away. AAA confirmed at \$4.65 (20 Jul), rising 4–5c/session for five straight prints; the 21–22 Jul prints are pending. A confirmed print at/above \$4.75 takes the score to 26 — the first move off 25 in six sessions.

The ceasefire decision window. Trump may continue strikes for several days before engaging; Israel is the wildcard the US has asked to hold back. Acceptance would open the first downgrade path in weeks (escalation 5→4 on a mediated stand-down); rejection migrates probability to full war and deal collapse. Watch for a named venue and date — that is the tell that the proposal is real.

Stage-4 Threshold B — 2.2 bp on the 10Y leg. One more long-end sell-off session trips the 10Y leg; the 30Y (6.9 bp) is the binding constraint. Any long-duration supply this week is the catalyst to watch; B tripping is the score's bridge from 25–26 toward the systemic scenarios.

Oil →3 (\$95) — \$6.48 on a close basis. Less than last week's advance. The fastest route is no longer Hormuz itself but Yanbu: a Houthi strike on the Saudi Red Sea outlet would hit the bypass cushion directly. The active COA contract at \$91.50 says the board is already trading closer to the trigger than the continuation series shows.

US-inflation →5 (5Y5Y above 2.30% sustained) — 8 bp. Two closes above 2.20% in hand and rising –1 bp/session; the 10Y BE is back above its pre-war anchor. The breakeven complex is following crude with a lag.

Gas complex. TTF printed a €60-handle intraday (first since March); Asia LNG's fresh ¥3,406 print is ¥24 from the war-era record. Watch European/Asian demand-rationing headlines and the next JGLA print — verify, never carry.

7 · Source log · this edition

Tier 1 — primary market data. Bloomberg Terminal extract (US Iran BBG Data.xlsx, restated front-month continuation series). Tickers: CO2/CL2 Comdty (Brent/WTI front-month; the CL2 22 Jul intraday print is flagged as likely stale vs the active CLA contract); COA/CLA Comdty (active, unscored, quoted for corroboration); NGA/TZTA/JGLA Comdty (JGLA printed FRESH 21 Jul at ¥3,406; no 22 Jul print); USGG2YR/5YR/10YR/20YR/30YR Index; USYC2Y10; USGGBE10 (22 Jul lagged; 21 Jul close used); USGG5Y5Y; SOFRRATE (lagged, 20 Jul); MOVE and VIX (21 Jul closes; 22 Jul lagged); DXY; AUTMUSAG (AAA pump — score reference; latest print 20 Jul \$4.65; 21–22 Jul pending) and USRFRUSA (DOE regular spot, weekly — corroboration; 20 Jul print \$4.001).

Tier 1 — news and institutional. Bloomberg (strikes extend to a tenth day; mediators propose truce), Axios (ceasefire framework terms: 10 days, dual-lane reopening, Malacca-style fees, IMO-linked fund; US response and air-power deployments; Israel posture), Reuters via Middle East Monitor (senior Iranian official confirms the 10-day proposal; willingness to negotiate), CNBC (Houthi blockade declaration on Saudi ports), Fox News / CENTCOM statement (20 Jul strike targets; ~900 escorted transits since May; US casualties), Financial Times via Fox (regime-change options re-emerging), straits.live (day count, transit ~11% of normal, ~340 anchored, 35 AIS-dark, 8× war-risk cover, six P&I; withdrawals, carrier rerouting), Windward, IMF PortWatch, US CENTCOM.

Tier 3 — state media (labelled). IRGC/Iranian claims — strikes on US installations in Jordan (Aqaba), Kuwait and Bahrain, and the threat to 'crush the source of US aggression' (Foreign Ministry spokesman Baghaei) — are labelled Tier 3 and corroborated against CENTCOM / Reuters / Axios before any market-moving use; the US has not confirmed the claimed hits. IRNA, Tasnim, Mehr, Press TV used only with explicit role labels.

8 · On-demand update protocol

#	Step	Detail
1	Refresh the Bloomberg extract	Parse the latest dated row (22 Jul) as intraday; reclassify 21 Jul as a final close; re-map columns via the robust scan (front-month CO2/CL2; both gasoline series; JGLA checked fresh — printed 21 Jul, flagged rather than carried; MOVE/VIX/BE10 22 Jul lagged, 21 Jul closes carried and labelled).
2	Recompute deltas	d/d vs the 21 Jul close; w/w vs the close five trading sessions back (15 Jul this edition); vs-pre-war vs the 27 Feb 2026 anchor (re-verified, unchanged).
3	Re-evaluate the six channels	Market channels move on confirmed closes only — all held: oil 2 (close \$88.52, under \$95); Treasury 5 (30Y 5.131% above 5.00%); US-inflation 4 (5Y5Y 2.219%, under 2.30%); political 4 (AAA \$4.65 confirmed, under \$4.75). Maritime/escalation event-based, both maxed.
4	Reconcile against the prior edition	The US session again marked UP through the Asia snapshot: Brent 21 Jul intraday \$86.61 → close \$88.52 (+\$1.91); WTI \$82.13 → \$84.34 (+\$2.21); 10Y 4.590% → 4.628% (+3.8 bp); 30Y 5.111% → 5.131% (+2.0 bp); 5Y5Y 2.208% → 2.219% (+1.2 bp); TTF €57.59 → €59.66 (+€2.07); MOVE 72.66 → 74.67.
5	Update scenarios and watchlist	Re-rank catalysts: political→5 (one pending print, 10c), Stage-4 B (2.2/6.9 bp), oil→3 (\$6.48 on a close basis; Yanbu the new fast route), US-inflation→5 (8 bp); mediated pause upgraded to 10% on the tabled framework; full war 37% still modal.

9 · Methodology

Shock-score scale. Six transmission channels (maritime denial, oil price shock, US inflation impulse, Treasury stress, political stress, escalation risk), each 0–5, summed to 0–30. Bands: 0–7 watch · 8–14 stress · 15–21 systemic-risk watch · 22–30 crisis. Market/economic channels move only on a confirmed close through a trigger; escalation-risk is event-based. **Hysteresis note:** upgrades fire on a sustained break; downgrades only on a sustained reversal past a wider threshold — deliberately, to avoid whipsawing. Treasury (5) was held through 15–17 Jul on hysteresis when MOVE fell below 75; the 20–21 Jul long-end sell-off has re-validated the hold on fundamentals (30Y 5.131%, MOVE 74.67 above pre-war). US-inflation (4) was held through the mid-July 5Y5Y dip below 2.20%; two consecutive closes above the line have ended that episode. **Scale cap:** maritime and escalation are both at 5/5, so further geopolitical deterioration — including the new Houthi front — cannot raise the score; only the four market channels can. A flat 25 must not be read as stability.

Gasoline series. Political-stress is scored on AUTMUSAG (AAA all-grades retail pump; pre-war \$3.52, peak \$5.18, latest confirmed print \$4.65 on 20 Jul — a fifth consecutive rise) for continuity; the 21–22 Jul prints are pending in the extract and the channel holds until they are confirmed. USFRUSA (DOE regular-grade retail spot; pre-war ~\$2.94, peak \$4.50, latest \$4.001 on 20 Jul — first \$4-handle since 15 Jun) is tracked alongside. See the chart in section 1.

Pre-war anchor (27 Feb 2026 close). Brent \$72.48; WTI \$67.02; 2Y 3.375%; 5Y 3.502%; 10Y 3.938%; 30Y 4.611%; 2s10s +55.64 bp; 5Y5Y 2.142%; 10Y BE 2.257%; MOVE 73.38; VIX 19.86; DXY 97.608; gasoline (AAA) \$3.52; Henry Hub \$3.06; TTF €31.23; Asia LNG ¥1,669. (Re-verified — unchanged.) Brent +23.6%, WTI +23.7%, TTF +93.4%, Asia LNG +104.1%; the 30Y (+53 bp), 5Y5Y (+8 bp), 10Y BE (+1.3 bp), MOVE (+1.29) and DXY (+3.56) all sit above their anchors; VIX and US Henry Hub remain below pre-war — with MOVE's crossing, the vol complex has begun to follow the level re-pricing.

Intraday caveat. The latest dated row is a Singapore-AM intraday snapshot; US-hours trading and headlines set the close (recent reconciliation gaps on Brent: +\$1.17, +\$1.99, +\$4.01, +\$2.46, −\$0.90, +\$1.91). The 22 Jul WTI (CL2) intraday print is flagged as likely stale against the active contract and treated as a data artifact. Market-channel triggers are evaluated on confirmed closes; escalation-risk is event-based. Absolute levels use the restated continuation series and are not directly comparable with pre-restatement editions, though the directional analysis is continuous.
